ABILITIES

Venom Sphere
Each time you make a Wound roll for this weapon, that roll only needs a 4+ to succeed, regardless of this weapon's Strength or the target's Toughness characteristic.

Power dagger
[ANTI-VEHICLE 5+]

False Colours
Until this model has made an attack, or ended a Charge move within Engagement Range of an enemy unit, it cannot be selected as the target of a ranged attack or a charge.

UNIT COMPOSITION

> **Designer's Note.** Built directly from the real HH3e digitized "Saboteur" profile (`Alpha Legion.json`), a Command-slot named character, 95pts real cost, translated using the standard ~0.76 character ratio to 70pts. Real stat line: M7/WS5/BS5/S4/T4/W3/I5/A4/LD8/CL8/WP7/IN8/SAV3+/INV-, Type Infantry (Specialist, Skirmish). Venom Sphere is real, a real toxin-grenade weapon (real S1, real Poisoned(4+)) — translated with the Strength/AP/Damage columns kept modest and the Poisoned effect translated as a flat 4+-to-wound clause, regardless of Strength or Toughness. Power dagger is real (real Breaching(5+), translated to Anti-vehicle 5+; real IM+2 is a moderate, not extreme, Initiative bonus and was left untranslated, matching this project's convention of reserving the Fights-First rendering for the largest IM bonuses only). False Colours is real and translated directly — one of the most distinctive real rules checked in this project: the source text makes this model literally untargetable until it has been "positively identified" by an Intelligence Check or reveals itself by attacking, translated as an inability to be targeted until it acts, the closest 11e analogue to an unidentified infiltrator. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
