SATURNINE TERMINATOR SQUAD

HEAVIEST PATTERN TERMINATOR PLATE (HH3E)

ADEPTUS ASTARTES • LEGIONES ASTARTES • HORUS HERESY

UNIT COMPOSITION: *1 Saturnine Sergeant + 4-9 Saturnine Terminators in Saturnine-pattern Terminator armour (the heaviest plate ever produced). All models carry combi-bolters and Saturnine power weapons. Up to 2 models may replace their combi-bolter with a Saturnine combi-flamer, combi-melta, or combi-plasma. The Sergeant may take a Saturnine chainfist or grav-fist in place of his power weapon.*

INVULNERABLE SAVE: 4+ (Saturnine atomantic field)

ABILITIES

FACTION — SONS OF THE LEGIONS

This unit is a generic Legiones Astartes (Horus Heresy era) datasheet usable by any of the 18 Legions. Detachment buffs and Legion-specific stratagems apply per the Legion this unit is fielded as (Loyalist or Traitor). When fielded in a 40K list, treat as having the **Oath of Moment** faction ability if Loyalist; **Dark Pact** if Traitor.

CORE

Deep Strike. Each time a model in this unit is destroyed, its Deadly Demise is 0 (the armour holds, even when the warrior inside is gone).

SATURNINE PATTERN PLATE

This is the heaviest pattern of Terminator armour ever produced. While this unit is targeted by an attack with a Damage characteristic of 1, the attack's Damage characteristic is reduced to 0. (This affects only D 1 attacks, not D2+ attacks — Devastating Wounds and similar bypass.) Additionally, this unit has the **Feel No Pain 6+** ability.

IMPLACABLE ADVANCE

This unit cannot be selected to make a Fall Back move and ignores modifiers to its Movement characteristic. The Saturnine plate does not retreat.

ATOMANTIC FIELD

The 4+ invulnerable save listed above is the Saturnine armour's integral atomantic stabiliser. Each time this unit is targeted by a **Psychic** attack, the invulnerable save improves to 3+ for that attack.

DESIGNER'S NOTE — *Saturnine-pattern Terminator armour is the NEW HH3e contribution to the Terminator suit roster: heavier than Cataphractii, slower than anything except a Dreadnought, and equipped with integral atomantic stabilisers that grant unmatched protection against psychic attack. No 10e equivalent — canonical 10e Terminators are the lighter Indomitus / Tactical patterns, and Cataphractii/Tartaros are 10e Legends. HB design: T5/Sv2+/W3 + 4+ inv (3+ vs Psychic) + Feel No Pain 6+ + a "Damage-1 attacks become Damage 0" rule (the iconic Saturnine signature, ignores Devastating Wounds), + cannot Fall Back, + Deep Strike, + Deadly Demise 0 (the armour does not detonate — it simply stands). 250 pts for 5 sits above canonical Terminators (200 pts) and Cataphractii Legends (~230); justified by W3 + the Damage-1 reduction + the FNP 6+ stacking. The squad excels against horde-fire (Damage 1) and crumples against Damage 2+ heavy weapons — intentional vulnerability so the unit isn't auto-include.* **11E CODEX UPDATE (18 OCT 2026):** *toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.*
