WARDED TERMINATOR RETINUE

LEGIONES ASTARTES • THOUSAND SONS • TRAITOR

Terminator plate is heavy enough without a warded sarcophagus layered underneath it — but the Sekhmet have learned that surviving the warp's attention matters more than moving quickly through it.

> **Designer's Note.** Built from the real HH3e digitized "Sekhmet Terminator Cabal" profile (`Thousand Sons.json`) — the Thousand Sons' Terminator-tier Cult Arcana squad, structurally the Legion's equivalent of Sons of Horus' Justaerin or Dark Angels' Deathwing. Real stat line for the Sekhmet Inceptor (Sergeant): M6/WS5/BS4/S4/T5/W2/A3/LD9/SAV2+/INV4+, 70pts unit fee (HH3e economy), 5-10 models. Priced at 220/435pts for 5/10. The real profile carries an optional paired Lightning Claws swap and a grenade harness (both real), translated the same way as this project's other Terminator-tier squads. Vanguard(3) is a real Victory-Point/deployment-scoring rule left unbuilt, matching how every other Vanguard(X) rule has been handled across

> this project's HH-era content. Implacable Advance, Bulky(2, untranslatable and omitted), and Slow and Purposeful are all real. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
