## UNIT COMPOSITION

**Keywords:** INFANTRY, SUN KILLER SQUAD

**Faction Keywords:** LEGIONES ASTARTES, EMPEROR'S CHILDREN

**Designer's Note.** Built from the real HH3e digitized "Sun Killer Squad" profile (`Emperor's Children.json`) — the Legion's dedicated anti-tank fire-support squad. Real stat line: Novaetor (Sergeant) M7/WS4/BS4/S4/T4/W1/I4/A1/LD9/SAV3+ (no invuln), Sun Killer the same but LD8, both 10pts/model plus a 25pts unit fee (HH3e economy), 5-20 models — every model in the unit must take the same heavy weapon, chosen from a real list of Volkite Culverin, Plasma Cannon, Multi-melta, or Lascannon (all +15-25pts/model). This card is priced and statted assuming the Lascannon option (the most expensive, and this project's standard "most representative" choice for card space, matching Iron Havocs' Autocannon precedent) at 145/295pts for 5/20; other weapon choices would price and perform differently. Designated Quarry is real, translated directly as a once-per-battle Hit-roll bonus against a chosen enemy Vehicle unit, preserving the real "did not move this turn" condition. Vanguard(2) and the vexilla option are omitted, matching this project's standard trimming of secondary equipment and Victory-Point-scoring rules. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Intercessor Squad 80→85.
