Designer's Note. Built from the real HH3e digitized "Terror Squad" profile (`Night Lords.json`) — the Legion's standard Troops choice, its equivalent of the Tactical/Despoiler squads fielded by other Legions. Real stat line: Headsman (Sergeant) M7/WS4/BS4/S4/T4/W1/I4/A3/LD9/SAV3+ (no invuln), Executioner the same but LD8/A2, both 18pts/model plus a 43pts unit fee (HH3e economy), 5-20 models. Priced at 100/180pts for 5/10, in line with other Legions' generic Troops squads. Hatred(Infantry) is real, translated using this project's established Dominator Cohort rendering (re-roll Hit rolls against the named category rather than a flat bonus); Fear(1) uses the standard "-1 modifier" rendering established across this Legion's other cards. The real profile's hidden Infiltrate(12) rule — unlocked army-wide only when a Sevatar model is present — is deliberately not duplicated here; it's already fully covered by Konrad Curze's own Sire of the Night Lords aura, matching this project's convention of documenting cross-unit synergies once, on the granting model's card, rather than on both sides. The real profile's full options list (bolter/volkite charger/flamer/rotor cannon/chainaxe exchanges, a disintegrator pistol, a vexilla) was trimmed for card space to the core chainsword/bolt pistol loadout, matching the simplification already applied to other generic Legion squads. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Intercessor Squad 80→85.
