HOMEBREW — HH-ERA (30K) — IRON WARRIORS ONLY — LORD OF WAR

THE TORMENTOR

555
POINTS

PERTURABO'S PERSONAL COMMAND VEHICLE

LEGIONES ASTARTES • IRON WARRIORS • TRAITOR

Nothing else in the Legion is permitted aboard it but the Lord of Iron himself and the automata that serve him — the Tormentor answers to exactly one master, and it has never once needed to answer to anyone else.

M	T	SV	W	LD	OC
10"	12	2+	22	6+	5

RANGED WEAPONS

WEAPON	RANGE	A	BS	S	AP	D
Volcano Cannon	120"	1	4+	20	-4	12
Twin Heavy Bolter	36"	6	4+	5	-1	2

ABILITIES

Volcano Cannon
[BLAST] [DEVASTATING WOUNDS] [ANTI-VEHICLE 2+]

Twin Heavy Bolter
[SUSTAINED HITS 1]

Core
[DEADLY DEMISE D6] [FIRING DECK 6]

Explodes
Each time this model is destroyed, roll one D6 before removing it from play: on a 4+, that model explodes, and each unit within 6" suffers D6 mortal wounds.

Lair of the Iron Tyrant
Only PERTURABO and IRON CIRCLE MANIPLE models can be selected to embark within this Transport.

UNIT COMPOSITION

1 The Tormentor model. Equipped with: 1 Volcano Cannon; 1 Twin Heavy Bolter. This model has a Transport Capacity of 14 PERTURABO and IRON CIRCLE MANIPLE models (Domitar-ferrum models take up 2 Transport Capacity each).

Keywords: VEHICLE, TRANSPORT, TITANIC, LORD OF WAR, THE TORMENTOR

Faction Keywords: LEGIONES ASTARTES, IRON WARRIORS

Designer's Note. Built from the real HH3e digitized "The Tormentor" profile (`Iron Warriors.json`) — a real, named Super-heavy Transport unique to Perturabo, and by a wide margin the largest single unit built anywhere in this project's Horus Heresy phase so far (every other Legion's roster has topped out around 220-270pts; this is a genuine Lord of War). Real profile: M10/BS4/Front Armour 14/Side Armour 13/Rear Armour 12/HP16, Transport Capacity 14, 700pts (HH3e economy) — the highest real point cost of any unit cross-checked in this entire project, including every Primarch. Deliberately excluded from the Legion Combat Patrol for the same reason Primarchs are excluded — its cost alone would consume the entire box budget. Priced at 550pts using a scaled ratio against Perturabo's own real-to-11e translation (700/425 applied to his 330pts). Wounds (22) were scaled from the real 16 HP using this project's established Vehicle HP-to-Wounds ratio. Volcano Cannon is real and canonically named — real R120"/D12, the single most powerful weapon profile built in this project, translated to a titan-killing Blast/Devastating Wounds/Anti-vehicle 2+ profile befitting a weapon that could threaten actual Titans in the source material. The real "Lair of the Iron Tyrant" rule (only Perturabo or Domitar-ferrum models may embark) is real and translated directly, rather than opened up to the whole Legion roster — this transport was never meant for line troops. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Thunderhawk Gunship 840→850.
