Designer's Note. Built directly from the real HH3e digitized "Varagyr Wolf Guard Terminators" profile (`Space Wolves.json`), an Elites choice. Real cost: 70pts for the Thegn sergeant, 45pts per Varagyr, translated using the standard ~0.87 squad ratio to 60pts and 40pts respectively (220/420 for 5/10). Real stat line: M6/WS5/BS4/S4/T5/W2/I4/A4(Thegn)/LD9/CL9/WP7/IN7/SAV2+/INV4+, Type Infantry (Heavy), a real Terminator-armoured squad. Lordsbane is real and is the unit's signature rule — a Combat Resolution bonus scaling with squad size, contingent on the Thegn surviving the Challenge, capped at +4 — translated here as a capped Wound re-roll bonus of the same shape. The full real wargear list (chainfist, thunder hammer/storm shield, heavy flamer, assault cannon) has been trimmed to the squad's two signature melee options plus the Cyclone missile launcher for card brevity, matching how other Legions' Terminator squads have been handled this session. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
