HOMEBREW — HH-ERA (30K)

VULKAN

420 POINTS

PRIMARCH OF THE XVIIITH LEGION, THE SALAMANDERS — THE LORD OF DRAKES

LEGIONES ASTARTES • SALAMANDERS • LOYALIST

The forge does not remember the wounds it took to make a thing whole.

ABILITIES

The Furnace's Heart
Each time this weapon damages a unit, that unit must take a Battle-shock test.

Dragon's Breath Gauntlet
[TORRENT]. Each time this weapon damages a unit, that unit must take a Battle-shock test.

Dawnbringer
[ANTI-VEHICLE 3+]. Each time an attack is made with this weapon, a Critical Hit is scored on an unmodified Hit roll of 5+ (instead of 6+).

The Undying Fire
Once per battle, at the end of the Fight phase, if this model has lost any wounds but was not destroyed this phase, it regenerates D3 wounds lost earlier this battle, up to a maximum of its starting Wounds characteristic.

Sire of the Salamanders [AURA]
During the first battle round, friendly Salamanders units automatically pass Battle-shock tests.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

UNIT COMPOSITION

1 Vulkan model. Equipped with: 1 The Furnace's Heart; 1 Dawnbringer; or 1 Dragon's Breath Gauntlet; 1 Dawnbringer.

Keywords: INFANTRY, CHARACTER, EPIC HERO, PRIMARCH, WARLORD, VULKAN

Faction Keywords: LEGIONES ASTARTES, SALAMANDERS

> **Designer's Note.** Built directly from the real HH3e digitized "Vulkan" profile (`Salamanders.json`). Real stat line: M7/WS7/BS6/S7/T7/W7/I5/A6/LD12/CL10/WP10/IN10/SAV2+/INV4+, 465pts (HH3e economy) — a real cost coincidentally identical to both Guilliman's and Ferrus Manus's real 465pts. His real T7/W7 stat line is genuinely unique among the Primarchs checked so far: every other real-T7 Primarch (Ferrus Manus, Perturabo, Mortarion) still carries a real baseline W6, while Vulkan's real W7 instead matches Horus Lupercal's own real-W7 outlier (whose real T6 stayed at the standard baseline, translating only to a bumped W11 at standard T9). Since Vulkan carries both the elevated real T7 and the elevated real W7 at once, this card compounds the two established bump rules rather than picking one: T10 (matching the Ferrus/Perturabo/Mortarion elevated-Toughness group) and W12, one step past Ferrus's own W11, to reflect his uniquely high real Wounds stacked on an already-elevated

> Toughness. Cost still lands at 360pts, the same figure as Guilliman and Ferrus, since his real cost ties exactly with theirs. Dawnbringer is his real signature power weapon (real Critical Hit(5+), the established elevated-Crit rendering; real Armourbane, translated to Anti-vehicle 3+). His ranged loadout is a genuine either/or in the real data: The Furnace's Heart (a Volkite pistol, real Panic(1)) or the Dragon's Breath Gauntlet (a Template flame weapon, translated via this project's standard Template-to-Torrent rendering, real Panic(2)) — both translated to a Battle-shock trigger on damage. The Undying Fire is a real, distinctively-worded Gambit (regenerate D3 Wounds if not reduced to 0 in the Strike Step) translated directly, a fitting mechanical nod to Vulkan's Perpetual/resurrection fluff even though HH3e itself predates and never explicitly names that later-established lore detail. Sire of the Salamanders is real; its actual text is a Force-Organisation Prime-Slots clause (unbuildable in 11e, omitted) plus a genuine first-Battle-Turn immunity to negative Leadership/Willpower/Cool/Intelligence modifiers for Salamanders models, translated as an automatic Battle-shock-test pass during the first battle round. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
