DETACHMENT — HORUS HERESY (30K)

WRATH OF ANGELS

BLOOD ANGELS (HH, LOYALIST) | WARHAMMER 40,000 | 11TH EDITION

Wrath of Angels is a fully homebrew Detachment for the Blood Angels (IX Legion) faction — a Horus Heresy-era Loyalist Legion detachment adapted to the Warhammer 40,000 11th-edition Detachment framework, built from the real HH3e Blood Angels Rite of War data. Formatted to match the No Figure Left Behind Combat Patrol archive.

FACTION ABILITY

ENCARMINE FURY
A Blood Angel who has just closed the distance hits harder than the plan called for. Each time a friendly Blood Angels unit fights, if it made a Charge move this turn, add 1 to the Strength characteristic of that unit's melee weapons.

DETACHMENT RULE

WRATH OF ANGELS
Detachment Points: To use this detachment you must spend 1 DP.

Shooting at the sons of Sanguinius from a distance only shortens the distance they have to close. Once per battle, after an enemy unit shoots a friendly Blood Angels unit, if that Blood Angels unit was not destroyed, you can select it to use this Detachment Rule. If you do, it can make a Normal Move of up to 6", moving as close as possible to the enemy unit that shot it (it cannot be moved within Engagement Range of any enemy units as a result of this move). If, after this move, that Blood Angels unit is within 6" of the enemy unit that shot it, that enemy unit must take a Battle-shock test.

FORCE DISPOSITIONS
This detachment has access to the following Force Disposition: Purge the Foe.

DETACHMENT COMPOSITION

Included: All homebrew Blood Angels (HH) roster units (Sanguinius, Chapter Master Raldoron, Dominion Zephon, Aster Chrone, Contemptor-Incaendius Dreadnought, Crimson Paladins, Dawnbreaker Cohort, The Angel's Tears, Sanguinary Guard, Ofanim Court, Inductii Squad), and any homebrew Legiones Astartes (HH) unit from the generic Space Marines (HH) roster given the Blood Angels Trait.

Excluded: Any other Legion's Primarch or named characters. Non-Legiones-Astartes allies, per standard HH3e Legion-purity convention.

ENHANCEMENTS

RELIC OF THE ANGELS — *Character model only*
Each time the bearer's unit fights, that unit's melee weapons have the [LETHAL HITS] ability.

STANDARD OF THE RED THIRST — *Character model only*
Each time the bearer fights, if the bearer's unit is below its Starting Strength, add 1 to the bearer's Attacks characteristic.

WINGS OF SANGUINIUS — *Character model with the [FLY] ability only*
Add 3" to the bearer's Movement characteristic.

ANGEL'S MERCY — *Character model only*
The first time the bearer would be destroyed, roll one D6: on a 4+, it is not destroyed and instead has 1 wound remaining.

DESIGNER'S NOTE

Homebrew — HH3e (2026) Blood Angels Legion Rite of War → 11e conversion. Built from the real HH3e Rite of War data in `Blood Angels.json`, which has one baseline rite with three named pieces. Legion Tactica "Encarmine Fury" is real (+1 Strength on a Charge turn) → Faction Ability, translated directly. Gambit "Thrall of the Red Thirst" (real: ignore negative Focus Roll modifiers for wounds lost, +1 Damage per wound, but no Outside Support bonus) became the identically-named Stratagem, translated as a Damage bonus that forgoes other friendly aura support, preserving the real "reckless bloodlust, no help needed or wanted" trade. Advanced Reaction "Wrath of Angels" (real: once per battle, a pure-Blood-Angels unit that is shot can move toward the shooter afterward, forcing a Cool Check/Pinned Status if it closes within 6") was promoted to the Detachment Rule itself, matching how every other Legion's flagship real mechanic has anchored its own detachment — and a fitting flagship for a Legion whose defining trait is that violence done to them only draws them closer. Descent of Angels, The Red Thirst, Grief Unending, Mercy of the Angel, and Crimson Reckoning are original stratagems filling out the standard six; Enhancements are original, themed around the Legion's angelic, blood-thirst, and grief-driven identity.
