

EBON KESHIG

BLADE OF THE STORM

LEGIONES ASTARTES • WHITE SCARS • LOYALIST

They walk into the storm on foot when the bikes can't follow, and nothing about being grounded slows down what they're there to do.

Designer's Note. Built from the real HH3e digitized "Ebon Keshig" profile (`White Scars.json`) — a dismounted honour-guard cadre, this Legion's Terminator-tier squad in all but name (no explicit Terminator keyword in the source, but a matching T5/SAV2+/INV5+ profile). Real stat line: Kharash M7/WS4/BS4/S4/T5/W2/I4/A3/LD10/SAV2+/INV5+ (Feel No Pain(6+)), a flat 5-10 model squad with no separate Sergeant entry, 35pts/model plus a 25pts unit fee (HH3e economy). Priced at 175/325pts for 5/10, using this project's established ~0.87 squad ratio. Power Glaive is real and canonically named, the unit's default melee weapon (real Breaching(5+), translated to Anti-vehicle 5+); a free Combi-bolter is the real default ranged option. Feel No Pain(6+) is real and translated directly. Expendable(2) and Vanguard(3) are both real Victory-Point-scoring/deployment rules with no clean 11e analogue and are left unbuilt; Bulky(2) is untranslatable fluff and omitted.
