ARLATAX BATTLE-AUTOMATA

230 POINTS

CYBERNETICA HEAVY ASSAULT ROBOT

MECHANICUM (HORUS HERESY)

The heaviest melee-spec Battle-Automata short of a Knight chassis — paired energy gauntlets crushing all before them, reactor cores overclocked to lethal excess.

ABILITIES

CORE: Deadly Demise D3

Faction — Doctrina Imperatives
See Army Rule.

Atomantic Shielding
This model has a 5+ invulnerable save.

Cortex Controller
While this unit is within 12" of a friendly Tech-Priest model, each time a model in this unit makes an attack you can re-roll a Hit roll of 1. If the friendly Tech-Priest has the Cybertheurgist keyword, re-roll all Hit rolls of 1.

Implacable Programming
This model automatically passes Battle-shock tests, and is unaffected by rules that would force it to Fall Back against its preprogrammed orders.

Reactor Surge
Once per battle, in your Command phase, you can activate Reactor Surge on this unit. Until your next Command phase, models in this unit have +2" Move, +1 Attack on melee weapons, and gain the [LANCE] ability on melee attacks. At the end of that next Command phase, each model in this unit suffers 1 mortal wound.

Plasma Fusil
[RAPID FIRE 2]

Paired Energy Gauntlets
[TWIN-LINKED] [SUSTAINED HITS 1]

UNIT COMPOSITION

3 Arlatax models. Add up to 2 more for +75 pts each. Every model is equipped with: 1 Plasma Fusil; 1 Paired Energy Gauntlets.

Designer's Note. HH3e Arlatax Battle Maniple. The heaviest melee-spec Battle-Automata short of a Knight chassis. T10 W8 OC3 anchors above Castellax/Domitar but below Knight-tier. Reactor Surge is the canonical HH3e signature — overclock for one round at a cost. **11th-edition verification, 2026-08-28:** confirmed the base "Arlatax" unit still current in fresh HH3e BSData (`Mechanicum.json`, non-hidden, typed "Automata (Antigrav)"). **Composition changed:** the "Arlatax (Paragon of Metal)" named-leader variant this card previously called for is

> now `hidden: true` in fresh BSData — unlike Castellax's Paragon of Metal (which has a genuinely unique Siege Wrecker weapon and needed restoring), Arlatax's Paragon of Metal has an IDENTICAL stat/weapon profile to the plain Arlatax, so there's no unique loadout being lost by dropping the distinction. Composition simplified to "3 Arlatax models," no named leader model. 11th-edition rules pass, 2026-10-10: regenerated from the NewRecruit NFLB catalogue so this card matches New Recruit exactly — official 11e weapon and wargear profiles wherever an official equivalent exists, 11e Orders and wording.
