CASTELLAX INFERNUS MANIPLE

195 POINTS

FLAME-PATTERN BATTLE-AUTOMATA

MECHANICUM (HORUS HERESY)

A purge-pattern Castellax variant, hull-mounted incinerators built to scour infantry and clear trenches — the anti-infantry counterpart to the bolter-armed Battle Maniple and the anti-tank Destructor-Automata.

ABILITIES

Faction — Doctrina Imperatives
See Army Rule.

Purge Incinerator
[TORRENT] [ANTI-INFANTRY 4+] — this weapon auto-hits, which is why it has no BS characteristic.

Atomantic Shielding
This model has a 6+ invulnerable save.

Iron Discipline
This unit automatically passes Battle-shock tests.

Firing Protocols (3)
Each time this model is selected to shoot, you can split its ranged attacks across up to 3 different enemy units (one weapon per target).

UNIT COMPOSITION

3 Castellax models. Every Castellax is equipped with: 1 Purge Incinerator; 1 Power Blades. This unit can include up to 2 additional Castellax models, each with the same loadout, for +65 points per model.

New card, built 2026-08-30. HH3e Castellax Infernus Maniple. Discovered during a folder-completion sweep of fresh HH3e BSData — a genuinely distinct Castellax loadout (`Mechanicum.json`, non-hidden) not covered by the existing Castellax Battle-Automata (bolter) or Castellax Destructor-Automata (anti-tank) cards. Checked current 40k 11e BSData first per standing NFLB practice (default to GW's own rules when they exist) — no "Castellax" entry exists anywhere in 11e data, confirming this is genuinely HH-only. Base profile (T6 W4 SAV3+ INV6+) is byte-identical to the other two Castellax cards, confirmed directly from BSData. Purge Incinerator is a real HH3e weapon (`Weapons.json`: Template/RS6/AP4/D1/Breaching(6+)/Flame) — translated as a Torrent template weapon per this project's established Torrent-weapon convention (blank BS is correct, not an error). Also confirmed the unit's own "Castellax (Paragon of Metal)" profile reference has a min:0/max:0 constraint (unselectable) — same dead content found and reverted elsewhere in this folder, not included here. Points costed by anchoring between the existing Battle-Automata (60/model) and Destructor-Automata (75/model) siblings, reflecting a mid-tier anti-infantry loadout — not a literal BSData point translation (HH3e uses a fundamentally different points economy). 11th-edition rules pass, 2026-10-10: regenerated from the NewRecruit NFLB catalogue so this card

> matches New Recruit exactly — official 11e weapon and wargear profiles wherever an official equivalent exists, 11e Orders and wording.
