> **Designer's Note.** HH3e Echidnax Servo Maniple. Mainly a force-multiplier — Targeting Cluster gives the army an anti-cover tool. **11th-edition verification, 2026-08-28:** confirmed still current in fresh HH3e BSData (`Mechanicum.json`, non-hidden, typed "Automata"). Real profile is notably tougher than this card originally assumed for a "drone/servo-skull swarm": T5/SAV3+/INV5+, not T4/SV5+/no invuln — this is a genuine small Cybernetica-pattern Automata, not a fragile flying servo-skull. **Corrected SV from 5+ to 3+** (direct armour-save mapping, same rule already applied to Arcuitor Magisterium) and **added the model's real 5+ invulnerable save**, which the original card omitted entirely. Kept T5 (was T4) and W1 as a reasonable middle ground for a cheap 6-12-model support unit. Also found "Echidnax (Paragon of Metal)" is `hidden: true` in current data (same family pattern as Castellax/Arlatax/Domitar) — the card never referenced a Paragon distinction to begin with, so no composition change was needed there. 11th-edition rules pass, 2026-10-10: regenerated from the NewRecruit NFLB catalogue so this card matches New Recruit exactly — official 11e weapon and wargear profiles wherever an official equivalent exists, 11e Orders and wording.
