MELEE WEAPONS

WEAPON	RANGE	A	WS	S	AP	D	KEYWORDS
Sentry gun chassis	Melee	1	6+	3	0	1	—

ABILITIES

Iron Discipline

This unit automatically passes Battle-shock tests.

Sentry Programming

This unit cannot move, Advance, Fall Back, or charge. If forced to make a Pile-In or Consolidation move, the model does not move.

Auto-Targeting Auspex

Each time a model in this unit makes a ranged attack, it has +1 to the Hit roll. This model is treated as Battle-Ready for Cover purposes (always benefits from Cover, even when no terrain is present).

Wargear Variants

Each Tarantula can replace twin lascannon with: twin heavy bolter (36" A6 S5 AP-1 D2 [Twin-linked, Sustained Hits 1]) or twin multi-melta (18" A2 S9 AP-4 D D6+2 [Twin-linked, Melta 2]).

Designer's Note

Homebrew — HH3e → 10e Conversion. HH3e Mechanicum Tarantula Battery. Static gun emplacements — the Mechanicum's pillbox-tier defensive option. M0" and Sentry Programming make them immobile. Anchored on Tarantula sentry-gun tier (basically tarantula HH stats brought to 10e).
