INVULNERABLE SAVE 5+

RANGED WEAPONS (HEAVY WEAPON SLOTS)

WEAPON	RANGE	A	BS	S	AP	D	KEYWORDS
Heavy bolter	36"	3	4+	5	-1	2	Sustained Hits 1
Autocannon	48"	2	4+	9	-1	2	—

Both heavy weapons may be swapped pre-battle for similar-class heavy weapons (e.g. missile launcher, lascannon, multi-melta) per the controlling Tech-Priest's preference.

MELEE WEAPONS

WEAPON	RANGE	A	WS	S	AP	D	KEYWORDS
Power glove	Melee	4	3+	10	-2	2	—

Industrial power fist on the off-arm — not the Conqueror's preferred engagement style, but enough to dismember anything that closes within reach.

ABILITIES

Core

Deadly Demise D3

Atomantic Cortex Shielding

This model has a 5+ invulnerable save.

Implacable Programming

This model automatically passes Battle-shock tests, and is unaffected by rules that would force it to Fall Back or leave the battlefield against its preprogrammed orders.

Multi-Target Cogitator

Each time this model is selected to shoot, you can split its ranged attacks: each of its ranged weapons can target a different enemy unit (rather than all weapons being required to target the same unit). This rule does not allow the Conqueror to target units it could not normally see or shoot.

Cortex Override Vulnerability

If there is no friendly **Adeptus Mechanicus Character** model within 12" of this model at the start of your Command phase, this model can only move toward the nearest visible enemy unit during its next Movement phase, and must attempt to charge if able.

Explodes (5+)

When this model is destroyed, roll one D6 before removing it from play; on a 5+ each unit within 6" suffers D3 mortal wounds.

Designer's Note

Homebrew — 1st Ed Rogue Trader (1987) lineage. The Conqueror from the *RT Compendium* carried two heavy weapons (default: heavy bolter and autocannon) alongside a power glove, marking it as the most weapon-dense of the five Imperial battle robots. The Multi-Target Cogitator ability captures the lore that a Conqueror's cortex was tuned to allocate fire across multiple battlefield priorities simultaneously — a forerunner of the targeting computers that would later appear on modern Adeptus Mechanicus combat platforms. Swap-outs follow Compendium tradition: any heavy slot can take a like-class heavy weapon.
