ABILITIES

Faction — Sons of the Legions

Generic Legiones Astartes (HH) datasheet usable by any of the 18 Legions. Treats as **Oath of Moment** (Loyalist) or **Dark Pact** (Traitor) for 40K interop.

Core

Deadly Demise D3, Deep Strike, Fly.

Transport

This model has a Transport capacity of 10 Legiones Astartes models OR 1 Castra Ferrum Dreadnought / 1 Saturnine Dreadnought / 1 Contemptor Dreadnought (10e Legends). Cataphractii/Tartaros Terminators count as 2 each.

Drop Pod Assault

This model must begin the battle in Strategic Reserves. It arrives via Deep Strike anywhere more than 9" from enemy models. Embarked units may disembark within 3" and are eligible to declare a Charge.

Post-Landing Mobility

Unlike a standard Drop Pod, the Dreadclaw can move after landing — in subsequent Movement phases it can re-position at M 12" (Fly). However, in a turn it moves, units may not embark or disembark.

Chaos-Tainted (Traitor-only optional)

If fielded by a Traitor Legion, this model gains the **Daemonic** keyword and the controlling player may re-roll one Hit and one Wound roll per phase for this model's attacks. (Optional flavor rule — declare at army-construction.)

RANGED WEAPONS

WEAPON	RANGE	A	BS	S	AP	D	KEYWORDS
Storm bolter (hull-mounted)	24"	2	3+	4	0	1	Rapid Fire 2
Magna-melta blast (downward thrust, once per battle, on landing)	6"	D3	4+	9	-4	D6+2	Torrent Melta 2

DESIGNER'S NOTE — Dreadclaw is a Dreadnought-capable drop pod with the unusual property of being able to fly back into orbit (or re-position on the table) after landing. Traitor Legions use it as a daemon-tainted variant. HB: T9/Sv3+/W8 (lighter than Kharybdis) + Deep Strike + Fly + Transport 10 OR 1 Dreadnought + post-landing Fly mobility + once-per-battle magna-melta blast on landing + an optional Daemonic upgrade for Traitor Legions. 95 pts. The only HH transport that can deliver a Dreadnought from orbit.
