

INFANTRY PLATOON

THE BACKBONE OF THE IMPERIAL GUARD

ASTRA MILITARUM • IMPERIUM • PLATOON

A Platoon is the largest body of Guardsmen that still answers directly to one Officer's voice — three squads or five, foot or mechanised, line infantry or weapons specialists. From Cadia's drilled regiments to the dust-line of Tallarn, from Catachan's jungle hunters to the iron tide of Armageddon, the Platoon is how Imperial Guard fights. Loose enough to bend to any regiment's doctrine; tight enough that every man knows the man on his left.

DATASHEET CONCEPT — A PLATOON AS ONE UNIT

This homebrew datasheet treats an entire Imperial Guard **Infantry Platoon** as a single unit on your roster. The Platoon counts as **1 Battleline unit** for army-construction purposes (one slot, one entry on your army roster). The Platoon comprises one mandatory Platoon Command Section and one or more sub-squads chosen from the composition list; each sub-squad has its own statline but they target, charge, and score as one unit (see *Combined Operations*).

The points cost is **modular by component, flat by sub-squad** — each sub-squad has a single flat cost (10th Edition idiom; weapon menus are **free**), and vehicles attach as priced add-ons. See the *Points Table* at the bottom of this datasheet. Per-regiment flavour (Cadian / Catachan / Steel Legion / Tallarn / Death Korps / etc.) is applied via Detachment rules layered on top of this datasheet, not changes to it.

COMPOSITION

- A Platoon Command Section — Mandatory, exactly 1**
5 models: 4 Veteran Guardsmen (PCS Base) + 1 Officer (Generic Castellan OR a named AM Officer Character — pick exactly one).
- B Infantry Squad — 2 to 5 squads**
Each: 10 models — 1 Sergeant + 9 Guardsmen. May take 1 special weapon and/or 1 heavy weapon team (no extra cost).
- C Heavy Weapons Squad — Optional, 0 to 1**
6 models forming 3 Heavy Weapons Teams (one gunner + one loader per team). Free mix-and-match heavy weapons.
- D Special Weapons Squad** 7th Ed last canon **— Optional, 0 to 1**
5 models: 1 Sergeant + 4 Special Weapons Guardsmen. Free mix-and-match special weapons, no duplicate cap.
- E Chimera Transport — Optional, up to 1 per sub-squad above**
*One Chimera may be attached to any sub-squad as its dedicated transport. Any combination from zero (foot-slogging Platoon) to one-per-squad (fully mechanised) is permitted. **Priced add-on** (see *Points Table*).*

SUB-SQUAD DATASHEETS

A — PLATOON COMMAND SECTION

The PCS is built from **two mandatory line items**: the *PCS Base* (the 4 Veteran Guardsmen, always the same), and the *Officer Attachment* (a single Officer model — either the generic Platoon Castellan or a named AM Officer Character). The Officer occupies the slot; you do not get both. Each line item has its own points cost (see *Points Table*).

A1 — PCS BASE (4 VETERAN GUARDSMEN) MANDATORY

M	T	SV	W	LD	OC
6"	3	5+	1	6+	2

DEFAULT WARGEAR

Lasgun, close combat weapon, frag & krak grenades.

WARGEAR OPTIONS (FREE, NO EXTRA COST)

Each of the 4 Veteran Guardsmen may individually choose one of: **(a)** keep default loadout, **(b)** replace their lasgun with one weapon from the Special Weapon list (Flamer / Grenade Launcher / Meltagun / Plasma Gun / Sniper Rifle / **Demolition Charge — 3rd-7th Ed**), or **(c)** be designated as a Specialist (Vox-caster / Medi-pack / Regimental Standard / **Master Vox — 3rd Ed**). At most one of each Specialist type per PCS. All choices are **included in the 25-pt PCS Base cost**.

A2 — OFFICER ATTACHMENT MANDATORY, PICK EXACTLY 1

Pick **one** Officer to lead the PCS. Choose either *Option 1* (generic Castellan, fixed cost) or *Option 2* (any named AM Officer Character, at their full points). You do not take both.

OPTION 1 — GENERIC PLATOON CASTELLAN

M 6"	T 3	SV 5+	W 3	LD 6+	OC 2
---------	--------	----------	--------	----------	---------

Default wargear: Laspistol, chainsword, frag & krak grenades. The Castellan issues Orders (see *Voice of Command*), is the Platoon's *Iron Discipline* anchor, and counts as the unit's Officer for army-rule purposes. **Wargear options (free)**: may replace laspistol with bolt pistol or plasma pistol; may replace chainsword with power weapon or power fist.

OPTION 2 — NAMED AM OFFICER CHARACTER

Replace the generic Castellan with **any single Astra Militarum Officer Character** from a canonical 10e datasheet or a project-homebrew card. The named character uses their **own statline, wargear, abilities, and full points cost** — you do not pay the 25-pt generic Castellan cost when this option is taken.

The named character fulfils the Officer role: they issue Orders via *Voice of Command* using either their own canonical Order list (if they have one) or the Platoon's *Voice of Command* rule (up to 2 Orders per Command phase), whichever is more generous. They anchor *Iron Discipline*. They count as the unit's Officer.

Eligible examples: **Captain Al'Rahem** (project homebrew), **Cadian Castellan**, **Lord Solar Leontus**, **Ursula Creed**, **Sergeant Harker**, **Colour Sergeant Kell** (project homebrew), etc. Any AM Character with the *Officer* or *[Leader]* keyword is eligible. The slot accepts **exactly one** Officer; you cannot stack two.

B — INFANTRY SQUAD (×2-5 IN PLATOON)

M 6"	T 3	SV 5+	W 1	LD 7+	OC 2
---------	--------	----------	--------	----------	---------

DEFAULT WARGEAR (PER 10-MODEL SQUAD)

Sergeant (1): Laspistol, chainsword, frag & krak grenades.

Guardsmen (9): Lasgun, close combat weapon, frag & krak grenades.

WARGEAR OPTIONS (FREE, NO EXTRA COST)

Sergeant melee/pistol swaps: may replace laspistol with bolt pistol or plasma pistol; may replace chainsword with power weapon or power fist.

Special Weapon — up to 1 per squad: one Guardsman may replace their lasgun with a Flamer / Grenade Launcher / Meltagun / Plasma Gun / Sniper Rifle / **Demolition Charge — 3rd-7th Ed**.

Heavy Weapon Team — up to 1 per squad **3rd-7th Ed**: two Guardsmen may form a Heavy Weapons Team (one gunner + one loader). The team replaces their lasguns with one weapon from the Heavy Weapon list (Autocannon, Heavy Bolter, Lascannon, Missile Launcher, Mortar, or **Heavy Stubber — 3rd Ed**).

Specialist — up to 1 per squad: one Guardsman may be designated as a Vox-caster (re-roll Order range), a Medi-pack bearer (5+ Feel No Pain for the squad), or a Regimental Standard bearer (auto-pass Battle-shock for the squad and the unit's other sub-squads within 6").

C — HEAVY WEAPONS SQUAD (OPTIONAL, 0-1)

M 6"	T 3	SV 5+	W 2	LD 7+	OC 1
---------	--------	----------	--------	----------	---------

COMPOSITION & WARGEAR (FREE MIX-AND-MATCH)

6 models forming 3 Heavy Weapons Teams. Each team selects one heavy weapon from the Heavy Weapon list (Autocannon, Heavy Bolter, Lascannon, Missile Launcher, Mortar, or **Heavy Stubber — 3rd Ed**); mix-and-match permitted across the 3 teams. Each model also has laspistol + close combat weapon + grenades.

D — SPECIAL WEAPONS SQUAD **HOMEBREW — 7TH ED** (OPTIONAL, 0-1)

M 6"	T 3	SV 5+	W 1	LD 7+	OC 1
-----------------------	----------------------	------------------------	----------------------	------------------------	-----------------------

COMPOSITION & WARGEAR (FREE MIX-AND-MATCH)

5 models: 1 Sergeant (laspistol + chainsword + grenades) + 4 Special Weapons Guardsmen. Each Guardsman selects one weapon from the Special Weapon list (Flamer / Grenade Launcher / Meltagun / Plasma Gun / Sniper Rifle / **Demolition Charge — 3rd-7th Ed**); mix-and-match permitted; **no limit on duplicates** — a full 4-melta or 4-plasma squad is allowed for thematic builds.

E — CHIMERA TRANSPORT (OPTIONAL, UP TO 1 PER SUB-SQUAD)

M 10"	T 9	SV 3+	W 11	LD 7+	OC 2
------------------------	----------------------	------------------------	-----------------------	------------------------	-----------------------

Stats and weapons match the canonical 10e Chimera datasheet. **Transport 12** Astra Militarum Infantry models (cannot transport Ogryn or Artillery). One Chimera may be attached to each sub-squad as its dedicated transport. Each Chimera within the Platoon counts as one model of the Platoon for casualty-removal purposes. The Officer may issue Orders while embarked (measure from the Chimera). **Default wargear (free)**: multi-laser turret + hull heavy bolter (may swap heavy bolter for heavy flamer at no cost). Smoke launchers.

PLATOON ABILITIES

Voice of Command

During your Command phase, the Officer may issue up to **2 Orders** to any sub-squad of this Platoon within 6" of the Officer (or while the Officer is embarked in a Chimera, measured from the Chimera). Orders use the canonical Astra Militarum Order list (*Take Aim!*, *Fix Bayonets!*, *Move! Move! Move!*, *First Rank, Fire!*, *Take Cover!*, etc.). If the Officer is a named Character with their own Order list, they may use either list each phase.

Combined Operations — Single Unit

The entire Platoon is treated as **one unit** for army-construction, target-selection, and points-counting purposes. Sub-squads, however, target separately in the Shooting phase, may declare Charges separately, and contribute Objective Control independently. Each Chimera within the Platoon counts as one model of the Platoon. The Platoon is destroyed only when every sub-squad in it has been destroyed.

Iron Discipline

While the Officer is on the battlefield (embarked or not), sub-squads of this Platoon can **re-roll failed Battle-shock tests**. (For an auto-pass effect, take a Regimental Standard specialist — see Sub-Squad Datasheets.)

Coordinated Disembark

When a Chimera in this Platoon is destroyed, embarked models disembark per the standard rule. The disembarked sub-squad has the **Stealth** ability and counts as having **Benefit of Cover** until the start of your next Movement phase.

MODULAR POINTS TABLE **V3 — FLAT 10E PRICING**

MANDATORY CORE — PLATOON COMMAND SECTION		POINTS
A1 — PCS Base (4 Veteran Guardsmen, all wargear options free)		25
A2 — OFFICER ATTACHMENT (PICK EXACTLY 1)		
Option 1 — Generic Platoon Castellan (all wargear options free)		25
Option 2 — Named AM Officer Character (Al'Rahem, Cadian Castellan, Lord Solar Leontus, Ursula Creed, Sgt Harker, etc.)		character's full pts

SUB-SQUADS (FLAT COST; ALL WARGEAR MENUS ARE FREE)	POINTS
BATTLELINE (2-5 OF THESE)	
Infantry Squad — 10 models (free: 1 special weapon + 1 heavy weapon team + 1 Specialist + Sergeant swaps)	60
SPECIALIST SUB-SQUADS (MAX 1 OF EACH)	
Heavy Weapons Squad — 6 models, 3 teams (free heavy weapon mix-and-match)	75
Special Weapons Squad — 5 models (free special weapon mix-and-match, no duplicate cap)	60
VEHICLE ADD-ON (PER SUB-SQUAD, MAX 1 EACH)	
Chimera Transport — standard loadout (multi-laser turret + heavy bolter or heavy flamer hull)	70
WORKED EXAMPLES (OFFICER = GENERIC CASTELLAN UNLESS NOTED)	
Minimum Platoon: PCS + 2 Infantry Squads (foot)	170
Standard Platoon: PCS + 3 Inf Sqd (each with grenade launcher + heavy bolter team)	230
Mechanised Platoon: PCS + 3 Inf Sqd (heavy bolter teams) + 4 Chimeras	510
Reinforced Platoon: PCS + 3 Inf Sqd + HW Sqd (3 lascannons) + SW Sqd (4 meltas) + 5 Chimeras	715
Maximal Platoon: PCS + 5 Inf Sqd + HW Sqd + SW Sqd + 8 Chimeras	1045
<i>Tallarn (Pattern A example): Al'Rahem replaces Castellan — PCS Base 25 + Al'Rahem (full pts) + Inf Sqd 60 + HW Sqd 75</i>	160 + Al'Rahem
Designer's Note — v3, 2026-05-18. v3 reworks the points model to match 10th Edition idiom: each sub-squad has one flat cost, and weapon menus are free (canonical Cadian Shock Troops at 60 pts includes a free special weapon + heavy weapons team; v3 anchors on that). Only the Chimera vehicle remains a priced add-on — the structural choice between foot and mechanised is worth paying for; granular weapon-loadout choices are not. The PCS is now split into two priced line items (PCS Base 25 + Officer 25) so that swapping a named Character into the Officer slot is clean math: drop the 25-pt generic Castellan, pay the named character's full points, no price-gap reconciliation needed. Both v2 "Pattern A" and "Pattern B" collapse into one rule: <i>Officer Attachment, pick exactly one</i>. This datasheet remains regiment-agnostic — the same statline serves Cadian, Catachan, Steel Legion, Tallarn, Death Korps, Mordian Iron Guard, Valhallan, and Vostroyan platoons, all using the appropriate canonical kits. Per-regiment flavour belongs in Detachment rules layered on top (e.g., <i>Mechanised Strike Force</i>, <i>Sons of Tallarn</i>). Expect tuning after playtest.
