

STEPPE KHAN'S HUNT

ATTILAN ROUGH RIDER STRIKE FORCE

ASTRA MILITARUM • ATTILAN • IMPERIUM

Mogul Kamir rides at the head of his clansmen as Attila's khans have ridden for ten thousand years. The lance is lowered before the war-cry is sung. Every model in this patrol is in the saddle — cyber-horse, living mount, or Krieg dirt-warhorse. By the time the enemy hears the hoof-beats over the steppe-wind, Kamir's full clan is already inside his shield-wall, and the foe's death is being accounted in lances, sabres, and trampling iron.

FACTION ABILITY — VOICE OF COMMAND

Attilan officers shout from the saddle, voice carrying over the war-horns of their riders.

At the start of your Command phase, each friendly **Officer** model can issue Orders to **Regiment** units within 6". A unit can only benefit from one Order at a time. Battle-shocked units cannot receive Orders. Mogul Kamir can issue the **Like Lightning!** Order in your Charge phase (see his datasheet).

DETACHMENT RULE — STEPPE KHAN'S HUNT

STAMPEDE

Each time a friendly **Astra Militarum Mounted** unit declares a Charge, you can re-roll the Charge roll AND that unit's hunting lance / goad lance attacks gain the **[SUSTAINED HITS 1]** ability until end of phase. In addition, friendly **Sentinel** units with the Scouts ability can perform a 4" **Normal Move** at the end of your opponent's Movement phase (a pre-battle outride that mirrors the cavalry doctrine).

ENHANCEMENTS

Your **Mogul Kamir** model is your Warlord and has the **Khan's Charge** Enhancement. You can replace this with **Steppe Hetman**.

DEFAULT ENHANCEMENT

KHAN'S CHARGE

The Khan's cyber-mount is built for a thousand years of charging, and the Khan has trained for every one of them.

The bearer has +1 **Attack** with their Hunting lance, and the unit they are leading **adds 2" to its Move characteristic**. When the bearer's unit Advances or Charges, the bearer's lance also gains the **[DEVASTATING WOUNDS]** ability for that combat (in addition to any other modifiers).

— OR —

OPTIONAL ENHANCEMENT

STEPPE HETMAN

To Attilan eyes, every horizon is a battle waiting to be ridden over.

Each time the bearer's unit Charges, models in the unit re-roll Hit rolls of 1. In addition, the bearer can issue the **Like Lightning!** Order to a second friendly Mounted unit within 6" (instead of his usual single target) when he uses that Order in your Charge phase.

SECONDARY OBJECTIVES

You will use the **Trampled** secondary objective. You can replace this with **Outflanking Patrol**.

DEFAULT SECONDARY OBJECTIVE

TRAMPLED

The steppe accepts whatever the riders kick into it — men, banners, or hopes.

At the end of the Charge phase or Fight phase, you score **3VP** if a friendly **Attilan** unit OR a friendly **Imperial Guard Rough Riders** unit destroyed one or more enemy units that phase via melee. You score an additional **2VP** if the destroyed unit was the enemy Warlord. Maximum 12VP per battle.

— O R —

OPTIONAL SECONDARY OBJECTIVE

OUTFLANKING PATROL

The Hetman never camps where his foes can find him — he camps where they're already dead.

At the end of each player's turn from the second battle round onward, you score **2VP** for each objective marker outside your own deployment zone that you control with at least one friendly Mounted unit wholly within range. Maximum 12VP per battle.

STRATAGEMS

HONOURABLE CHARGE **1 CP**

Steppe Khan's Hunt — Battle Tactic Stratagem

An Attilan rider's first wound is given freely. The second is taken back at lance-point.

WHEN: The Fight phase, just after a friendly **Attilan** or **Imperial Guard Rough Riders** unit has been selected to fight.

TARGET: That Mounted unit.

EFFECT: Each model in your unit gains +1 **Attack** with its lance until the end of the phase. If your unit Charged this turn, lance attacks also gain +1 to the **Wound** roll.

LIGHTNING REPOSITIONING **1 CP**

Steppe Khan's Hunt — Strategic Ploy Stratagem

The horsemen wheel before the foe's auspex finishes its read — lances are already pointed at his flank.

WHEN: End of your Charge phase.

TARGET: One friendly **Astra Militarum Mounted** unit that did not Charge this turn.

EFFECT: That unit can make a 3" **Normal Move**, which can leave Engagement Range. It cannot enter Engagement Range with this move.

THE HETMAN'S WHISPER **2 CP**

Steppe Khan's Hunt — Epic Deed Stratagem

Mogul Kamir scouts the foe from the high passes for a week before the battle — and then descends on whatever flank he chose.

WHEN: Start of the battle round, after the start of battle round 2.

TARGET: Mogul Kamir + the Attilan Rough Riders unit he leads, IF that unit is in Strategic Reserves.

EFFECT: Set up Mogul Kamir's unit anywhere on the battlefield more than 6" from enemy units (instead of the standard 9"). The unit can declare a Charge in the same turn it arrives (the Charge roll cannot be re-rolled). Use this Stratagem only once per battle.

DESIGNER'S NOTE — *This is an all-saddle Combat Patrol — every model is on a mount, no infantry, no walkers, no transports. The three cavalry datasheets mix at three tiers: canonical 10e Attilan Rough Riders (Legends), homebrew Imperial Guard Rough Riders (generic 7th Ed source), and canonical 10e Death Riders of Krieg (tournament-legal). All three share M10-12", T4, SV4-5+, W2, and one-shot or lance-pattern melee weapons. Mogul Kamir leads the Attilan squad as his historical retinue; the Death Riders represent allied Krieg cavalry pressed into Kamir's expedition. The detachment rule's **STAMPEDE** (lance attacks gain [SUSTAINED HITS 1] on Charge, re-roll Charge) applies to every unit in this list, and the Lightning Repositioning stratagem keeps the whole army at lance-tip distance from the foe each turn. Paint scheme: Attilan steppe red + bone trim + black war-paint patterns; Death Riders in Krieg grey-and-black with rust-brown duster cloaks.*
