ABILITIES

Faction — Sons of the Legions

Generic Legiones Astartes (HH) datasheet usable by any of the 18 Legions. Treats as **Oath of Moment** (Loyalist) or **Dark Pact** (Traitor) for 40K interop.

Composition

This datasheet covers a Battery of 1-3 Tarantula Sentry Guns. Each Tarantula is a separate single-model unit deployed and tracked independently. Points listed (40 pts) are per Tarantula. Battery sold as: 1 (40), 2 (80), or 3 (120) Tarantulas.

Core

Deadly Demise 1. This model cannot move under any circumstances. It cannot Fall Back, cannot be moved by abilities, and cannot embark/disembark.

Automated

This model is unmanned. It auto-passes Battle-shock tests and ignores morale-affecting abilities. It cannot perform Actions, cannot hold objectives (OC 0), and cannot be selected as the target of friendly buffs that require it to be a model with a crew or operator.

Automated Targeting

At the start of each Shooting phase, instead of being selected by the controlling player, this model fires automatically at the nearest visible enemy unit within range. (The Tarantula's targeting cogitator is a basic threat-prioritisation system.)

RANGED WEAPONS

WEAPON	RANGE	A	BS	S	AP	D	KEYWORDS
Heavy bolter (default)	36"	3	4+	5	-1	2	Sustained Hits 1 Heavy
Lascannon (option, +20 pts)	48"	1	4+	12	-3	D6+1	Heavy
Heavy stubber (option, -10 pts)	36"	4	4+	4	0	1	Heavy
Twin multi-melta (option, +15 pts)	18"	2	4+	9	-4	D6	Melta 2 Heavy Twin-linked

DESIGNER'S NOTE — *Tarantula is the Heresy's automated sentry turret — unmanned, immobile, fires at the nearest visible enemy automatically. No 10e analog (canonical 10e doesn't have automated sentries). HB: T6/Sv4+/W3 (compact emplacement) + Immobile + Automated (auto-fire at nearest enemy each Shooting phase) + 4 weapon options at +/- modifier pricing. 40 pts base for a heavy bolter Tarantula; lascannon at +20 makes it 60 pts. Sold in batteries of 1-3 turrets. Defensive force-multiplier: park them on objectives, they hold the ground forever (or until killed).*
