ABILITIES

Atomantic Shielding

This model has a 5+ invulnerable save.

Cortex Controller

While this unit is within 12" of a friendly **Tech-Priest** model, each time a model in this unit makes an attack you can re-roll a Hit roll of 1. If the friendly Tech-Priest has the **Cybertheurgist** keyword, re-roll all Hit rolls of 1.

Implacable Programming

This model automatically passes Battle-shock tests, and is unaffected by rules that would force it to Fall Back against its preprogrammed orders.

Doctrina Imperatives

This model gains the effect of the chosen Doctrina Imperative each Command phase (Conqueror: Hit roll of 6 scores an additional Hit; Protector: enemy Hit rolls suffer -1). See faction ability card.

Siege Cogitator

Each time this model makes an attack that targets a **Vehicle**, **Monster**, **Battle-Automata** or **Fortification**, re-roll Wound rolls of 1.

Deadly Demise D6

When this model is destroyed, roll one D6 before removing it; on a 6 each unit within 6" suffers D6 mortal wounds.

Designer's Note

Homebrew — HH3e → 10e Conversion. HH3e Thanatar Siege Maniple. The heaviest Battle-Automata chassis short of an Ordinatus. Statline approaches Knight-tier (T11 W12) reflecting siege-class armour. Hellex plasma mortar is the canonical HH3e Thanatar armament; Calix and Cynis variants listed as wargear options to consolidate the three Thanatar sub-patterns into one card.

WARGEAR OPTIONS

VARIANT LOADOUTS (THANATAR-CALIX / THANATAR-CYNIS): The Hellex plasma mortar may be replaced with a *Sollex-Pattern heavy lascannon array* (60" A2 S14 AP-4 D D6+2 [Lance, Heavy]) for the Calix variant, or with a *graviton ram battery* (24" A D3+1 S12 AP-3 D D6 [Blast, Anti-Vehicle 3+]) for the Cynis variant. The twin mauler bolt cannon is fixed across all variants.
