ABILITIES

Atomantic Shielding

This model has a 5+ invulnerable save.

Implacable Programming

This model automatically passes Battle-shock tests, and is unaffected by rules that would force it to Fall Back against its preprogrammed orders.

Doctrina Imperatives

This model gains the effect of the chosen Doctrina Imperative each Command phase (Conqueror: Hit roll of 6 scores an additional Hit; Protector: enemy Hit rolls suffer -1). See faction ability card.

Repulsor Lift

This model has the FLY keyword. In your Movement phase, this model can FLY, ignoring all terrain and other models when it moves.

Aerial Hunter

Each time this model makes a ranged attack that targets a unit with the FLY keyword, you can re-roll the Hit roll and improve the AP characteristic of that attack by 1.

Designer's Note

Homebrew — HH3e → 10e Conversion. HH3e Vultarax Stratos Squadron. The Mechanicum's flying Battle-Automata — a rare HH-only chassis with no 40K equivalent. Statline blends Skyweaver speed (M14, Fly) with Battle-Automata durability (T8 Sv2+). Anti-Fly bonus gives it a clear board role.
