ABILITIES

Core

Deadly Demise D3

Atomantic Shielding

Auxiliary atomantic field generator. This model has a 5+ invulnerable save.

Steady Foundation

If this model did not Advance or Fall Back during its preceding Movement phase, each time it makes a ranged attack you can re-roll a Hit roll of 1, and if the target is more than 24" away from this model, you can re-roll all Hit rolls of 1.

Wrath of the Beam

Each time this model makes a ranged attack with the **dispersed** profile of its Furibundus conversion beamer that targets a Monster or Vehicle, you can re-roll the Wound roll.

Implacable Advance

This model automatically passes Battle-shock tests.

Explodes (5+)

When this model is destroyed, roll one D6 before removing it from play; on a 5+ each unit within 6" suffers D3 mortal wounds.

Designer's Note

Homebrew — 1st Ed (Rogue Trader, 1987) lineage. The Furibundus Class Destroyer pattern is the ranged half of the original *Rogue Trader* Space Marine Dreadnought's four-arm hardpoint configuration — where Chuck took the close-assault role, Fury takes the gunline role. The canonical Furibundus chassis was a long-range siege walker; the "Destroyer" sub-pattern from Heresy-era Mechanicum lore mounted conversion beamers in a squadron-level firebase role. This 10e build uses a Brutalis/Redemptor-tier statline with a dual-profile beamer that rewards range (in keeping with conversion-beam lore) and pairs it with a single anti-armour siege claw — this is a walker that *parks*, not chases. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
