LEADER

This model can be attached to one of the following units: **Intercessor Squad**, **Assault Intercessor Squad**, **Tactical Squad**, **Sternguard Veteran Squad**, **Bladeguard Veteran Squad**.

MASTER OF CHIRURGERY

At the end of your Movement phase, select one friendly **Salamanders Infantry** or **Salamanders Biker** unit within 3" of this model. One of the following effects (your choice):

• **Heal:** One model in that unit regains up to **D3+1** lost wounds.

• **Revive:** If no model in that unit is wounded but one or more models have been destroyed during the battle, roll one D6: on a **3+**, return one destroyed model to the unit with 1 wound remaining.

If the Revive roll fails, this model cannot shoot, charge, or fight for the rest of the turn (recovering the gene-seed). A unit can only be the target of this ability once per turn.

PROMETHEAN VIGIL

Each time a friendly **Salamanders** model loses a wound while within 3" of this model, you can roll one D6: on a **6**, that wound is not lost.

DESIGNER'S NOTE

Homebrew — 8th Ed source. Harath Shen is the Master Apothecary of the Salamanders — distinguished from canonical 10e Apothecaries by his unique Bloodfire volkite-pattern pistol and a more aggressive battlefield doctrine than typical Apothecaries. Stats anchor on the 10e Apothecary baseline (T4/W4/Sv3+) with slightly elevated WS3+ and A4 reflecting the 8e profile. No invulnerable save (Apothecaries don't typically have one). Master of Chirurgery is the canonical heal-or-revive ability with the exact 8e wording (gene-seed recovery cost on failed revives). Promethean Vigil is new homebrew flavor — Salamanders within his protection get a 6+ FNP-equivalent, reflecting that no Salamander has died on his watch in 4 centuries. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
