ABILITIES

Core

Deadly Demise D6, Fly, Jump Pack.

Faction

Oath of Moment.

Battlesworn Warrior

This model cannot be your Warlord.

Augmented Atomantic Shielding

This model has a **5+ Invulnerable Save**. In addition, each time an attack would inflict damage on this model, on an unmodified attack-roll Wound roll of **1**, the damage is reduced to 0.

Groundstrike

After this model finishes a Charge move, select one enemy unit within Engagement Range. That unit suffers **D3 mortal wounds**.

Combat Doctrina

This model is eligible to declare a charge in a turn in which it Advanced (a Mortis-pattern Contemptor moves like a Predator with engines redlined).

Designer's Note

Homebrew — 8th Ed source. Hecaton Aiakos is the Minotaurs' most famous Contemptor-Mortis pattern Dreadnought, distinguished by a jump-pack thrust system that allows the chassis to land in melee with kinetic force. Stats anchor on

the 10e Redemptor Dreadnought baseline (T10/W11/Sv2+) elevated for Mortis-class chassis. M9" + Fly + Jump Pack preserves his canonical fast-deploy archetype. The 8e wound-bracket (WS/BS/A degrading) is replaced with the cleaner 10e flat-stat convention, but the relic's signature "D3 MW after charge" rule is preserved verbatim as Groundstrike. Cannot be Warlord per the canonical Battlesworn Warrior rule (he's a Dreadnought, not command). **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
