### ABILITIES

**CORE**

Leader, Deep Strike.

**FACTION**

Oath of Moment.

**LEADER**

This model can be attached to one of the following units: **Tactical Squad**, **Sternguard Veteran Squad**, **Bladeguard Veteran Squad**, **Vanguard Veteran Squad**, **Assault Intercessor Squad**.

**ACTINIC HALO**

This model starts the battle with a **2+ Invulnerable Save**. The first time this model fails an Invulnerable save in any phase, its Invulnerable save is permanently reduced to **6+** for the rest of the battle (the halo overloads).

**RITES OF BATTLE (MARINES ERRANT)** [AURA]

While a friendly **Marines Errant** unit is within 6" of this model, each time a model in that unit makes an attack, you can re-roll a Hit roll of **1**.

**ERRANT VIGILANCE**

On a turn this model finishes a Charge move, Thundershock gains the [PISTOL] ability — it can be fired into Engagement Range.

## Designer's Note

Homebrew — 8th Ed source. Anton Narvaez is the Lieutenant Commander of the Marines Errant 2nd Company — a sky-blue and cream Chapter Master-aspirant. Stats anchor on the 10e Lieutenant baseline (T4/W5/Sv3+) but with Captain-tier OC and the unique Actinic Halo invuln-degrade rule preserved verbatim from his 8e profile. Voidshard power blade's Wound 6+ = MW rule from 8e is translated to Devastating Wounds (10e equivalent). Thundershock keeps its 24" D3 assault profile. Errant Vigilance is new homebrew flavor — captures his lore role as a forward Lt Commander. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
