

DEREDEO CLASS ATTACK SUPPORT DREADNOUGHT

"EDDY"

ADEPTUS ASTARTES • IMPERIUM

A walking firebase. The shoulder-mounted Anvilus autocannons cycle in linked-firing pairs; the dorsal Aiolos missile rack ranges blind targets through chassis-cogitator triangulation; the chest heavy bolter sweeps the close approach.

M	T	SV	W	LD	OC
5"	9	2+	12	7+	3

Invulnerable Save (Greater Atomantic Deflector): 5+ (4+ against ranged attacks)

RANGED WEAPONS

WEAPON	RANGE	A	BS	S	AP	D
Anvilus autocannon battery	48"	6	3+	9	-1	2
Aiolos missile launcher	48"	4	3+	6	-1	2
Twin heavy bolter	36"	3	3+	5	-1	2

MELEE WEAPONS

WEAPON	RANGE	A	WS	S	AP	D
Dreadnought close combat weapon	Melee	3	4+	10	-1	2

ABILITIES

Anvilus autocannon battery

[SUSTAINED HITS 1]

Aiolos missile launcher

[INDIRECT FIRE] [BLAST]

Twin heavy bolter

[SUSTAINED HITS 1] [TWIN-LINKED]

Core

[DEADLY DEMISE D3]

Greater Atomantic Deflector

A reinforced atomantic field tuned for sustained barrage. This model has a 5+ invulnerable save, and a 4+ invulnerable save against ranged attacks.

Anti-Air Targeting Cogitator

Each time this model makes a ranged attack that targets a unit with the Fly keyword, re-roll a Hit roll of 1, and improve the Armour Penetration characteristic of that attack by 1 (e.g. AP -1 becomes AP -2).

Linked Cogitator Array

Each time this model is selected to shoot, if two or more of its ranged weapons target the same enemy unit, until the end of the phase those weapons gain the [SUSTAINED HITS 1] ability if they do not already have it, and weapons that already have [SUSTAINED HITS 1] gain [SUSTAINED HITS 2] instead.

Implacable Advance

This model automatically passes Battle-shock tests.

UNIT COMPOSITION

1 Deredeo Class Attack Support Dreadnought model. This model is equipped with: 1 Anvilus autocannon battery; 1 Aiolos missile launcher; 1 twin heavy bolter; 1 Dreadnought close combat weapon.

Keywords: VEHICLE, WALKER, DREADNOUGHT, "EDDY"

Faction Keywords: IMPERIUM, ADEPTUS ASTARTES

Designer's Note. This card represents the original 1987 Rogue Trader metal Space Marine Dreadnought miniature refitted as a fire-support pattern, distinct from the modern Forge World resin Deredeo kit. "Eddy" is a walking firebase: Anvilus autocannons, an indirect-fire Aiolos missile rack, and a close-approach heavy bolter, with Linked Cogitator Array rewarding focused fire and Anti-Air Targeting Cogitator for anti-Fly work. **11th-edition verification, 2026-08-31:** a real "Deredeo Dreadnought [Legends]" now exists in current BSData (M6"/T9/Sv2+/W12/LD6+/OC3, 5+ inv) — for the modern Forge World resin kit, a different physical model from the 1987 metal miniature this card represents, with a genuinely distinct weapon loadout, so it remains homebrew rather than being retired. Used the real chassis as a calibration reference for the "rules jump": tightened T10→T9 to match the canonical Deredeo baseline. Kept M5" (slower than the real M6") — fluff-justified as a stationary fire-support build, distinct from Chuck's mobile jump-pack "Close Assault" variant.
