CATAPHRACT BATTLE ROBOT

145 POINTS

TRI-SPECTRUM FIRE PLATFORM

ADEPTUS MECHANICUS • IMPERIUM

The Cataphract carries three weapons spanning long, medium, and close range — one of each spectrum. The lascannon may be swapped for a similar-class heavy weapon (e.g. multi-melta, missile launcher); the bolt gun and flamer may each be swapped for like-class weapons.

ABILITIES

CORE: Deadly Demise D3

Faction — Doctrina Imperatives
See Army Rule.

Atomantic Cortex Shielding
This model has a 5+ invulnerable save.

Implacable Programming
This model automatically passes Battle-shock tests, and is unaffected by rules that would force it to Fall Back or leave the battlefield against its preprogrammed orders.

Linked Doctrine
Each time this model is selected to shoot, if two or more of its ranged weapons target the same enemy unit, all attacks made by this model against that unit until the end of the phase have the [LETHAL HITS] ability.

Cortex Override Vulnerability
If there is no friendly Adeptus Mechanicus Character model within 12" of this model at the start of your Command phase, this model can only move toward the nearest visible enemy unit during its next Movement phase, and must attempt to charge if able.

Explodes (5+)
When this model is destroyed, roll one D6 before removing it from play; on a 5+ each unit within 6" suffers D3 mortal wounds.

Bolt Gun
[RAPID FIRE 1]

Flamer
[TORRENT] [IGNORES COVER]

Designer's Note. The Cataphract from the RT Compendium (1987) carried three ranged weapons in distinct hardmounts (lascannon, bolt gun, flamer) and no dedicated melee armament — a deliberate design choice to make it the most weapon-versatile of the five Imperial battle robots, able to threaten armour, infantry, and hordes simultaneously. The Linked Doctrine ability rewards concentrating fire on a single priority target while still allowing flexible engagement. **11th-edition verification, 2026-08-31:** checked current 11e BSData directly (including broadened searches for "Cataphract", "Battle Robot") — no match anywhere; still genuinely unsupported. No related real chassis exists to calibrate against (the designer's note's "Domitar Pattern Vorax" reference is itself an earlier homebrew HH conversion from this project, not real GW data). No stat corrections possible; kept as-is from the prior 10e conversion pass. 11th-edition rules pass, 2026-10-10: regenerated from the NewRecruit NFLB catalogue so this card matches New Recruit exactly — official 11e weapon and wargear profiles wherever an official equivalent exists, 11e Orders and wording.
