

CAESTUS ASSAULT RAM

ATMOSPHERIC RAMMING TRANSPORT

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Heresy's ramming assault flyer — an atmospheric transport designed to crash through bunkers and disgorge its Marines directly into the enemy formation, reinforced prow first.

Transport

This model has a transport capacity of 10 Legiones Astartes models. Cataphractii and Tartaros Terminators count as 2 models each. Saturnine Terminators count as 3 models each.

Ramming Charge

On a turn in which this model arrived via Deep Strike, or moved 12" or more in the Movement phase, it can declare a Ramming Charge against one enemy Vehicle or Fortification unit within 1" at the end of its move. Roll one D6: on a 2+, that target suffers D6+2 mortal wounds. On a 6+, the target also suffers a Deadly Demise check (roll one D6: on a 4+, it takes a further D3 mortal wounds).

Assault Drop

Embarked units can disembark from this model after it has made its full Movement (instead of before). Units that disembark this way this turn are eligible to declare a charge.

UNIT COMPOSITION

1 Caestus Assault Ram model. This model is equipped with: 1 pair of Magna-Melta Cannons; 1 Twin Firefury Bolter; 1 Reinforced Ram-Prow.

Designer's Note. Caestus is the Heresy's ramming assault flyer — an atmospheric transport designed to crash through bunkers and disgorge 10 Marines (or 5 Cataphractii / 3 Saturnine) directly into the enemy formation. No direct 10e/11e analog. HB: T11/Sv3+/W14, Fly, Deep Strike, Transport 10, a Ramming Charge dealing D6+2 mortal wounds to enemy Vehicles/Fortifications, and post-move disembark with charge eligibility. 220 pts — pairs naturally with the Master of Descent for no-scatter precision. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSDData ('Legiones Astartes.json', non-hidden, typed "Vehicle (Transport, Flyer)"). Real profile uses the older Vehicle armour-facing format (Front13/Side13/Rear13/HP7) rather than T/W/SV — no direct

comparison possible, kept as-is (format conversion only). Real Transport Capacity is 16 vs this card's 10, but the card's lower figure already reflects an intentional slot-cost design (Cataphractii/Tartaros at 2 slots, Saturnine at 3), same reasoning applied to Triaros Armoured Conveyor and Mechanicum Macrocarid Explorator elsewhere in this project — kept as-is.
