

DESTROYER SQUAD

OUTCAST ANTI-PERSONNEL SPECIALISTS

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Heresy's pariah-specialists — Legionaries deemed too radiologically and chemically contaminated for mainline duty, equipped with weapons their fellow Astartes consider dishonourable: rad grenades, phosphex, weaponised volkite.

ABILITIES

Hand Flamer

[TORRENT] [PISTOL] [IGNORES COVER] — auto-hits, which is why it has no BS characteristic.

Volkite Serpenta

[PISTOL] [DEVASTATING WOUNDS]

Phosphex Bomb-Thrower

[BLAST] [ANTI-INFANTRY 2+] [IGNORES COVER]

Rad Grenades

In the Fight phase, before this unit makes its attacks, select one enemy unit within Engagement Range of it. Until the end of the turn, that enemy unit's Toughness characteristic is reduced by 1 (to a minimum of 1).

Phosphex Munitions

Each time a model in this unit makes a ranged attack with a phosphex weapon, an unmodified Hit roll of 5+ scores 1 mortal wound in addition to any normal damage. Phosphex attacks cannot be allocated to Vehicle models with a Toughness characteristic of 10 or higher.

Outcast

This unit cannot be your Warlord, cannot be given Enhancements, and cannot be the target of friendly Faction ability effects that grant Battle-shock immunity.

Jump Pack Assault (Assault Destroyer variant only)

If the Assault Destroyer variant was selected, this unit has the Deep Strike ability and is eligible to declare a charge in a turn in which it arrived from Reserves.

UNIT COMPOSITION

5 or 10 models: 1 Destroyer Sergeant and 4-9 Destroyer Legionaries. All models are equipped with Rad Grenades, Hand Flamers (or Volkite Serpentas), and Chainswords. 1 in 5 models can replace its Hand Flamer with a Phosphex Bomb-Thrower. The Sergeant can replace its Chainsword with a Power Weapon. Assault Destroyer variant: the entire squad is equipped with jump packs and has M12", for +25 points per 5 models.

Designer's Note. Destroyer Squads are the Heresy's pariah-specialists: Legionaries deemed too radiologically and chemically contaminated for mainline duty, equipped with weapons their fellow Astartes consider dishonourable — rad grenades, phosphex, weaponised volkite. No direct 10e/11e analog. HB design: standard Marine statline plus a rad-grenade mechanic that reduces an enemy unit's Toughness by 1 in melee (a direct port of the HH rule), phosphex munitions for mortal-wound output, and an "Outcast" downside that locks them out of Warlord/Enhancement slots. Two profiles: foot (110/220 pts) and Assault Destroyer with jump packs (+25/+50 pts, M12", gains Deep Strike and charge-from-reserves). Cheap mass-mortal-wound delivery with a defensive penalty that keeps them honest. **11th-edition verification, 2026-08-30:** real profiles confirmed in `Legiones Astartes.json` — both "Mortalis Destroyer Squad" (foot form) and "Destroyer Assault Squad" (jump-pack form, typed "Infantry (Antigrav)", M12) share SAV3+/no invuln, matching this card exactly on both variants. No correction needed.
