Designer's Note. Fire Raptor is the Heresy's anti-infantry gunship — a Storm Eagle variant configured as a flying weapons platform (the Chaos Imperial Armour version is the better-known model). HB: T11/Sv3+/W14 (Stormhawk Interceptor tier), Hover, Fly, 16 quad-heavy-bolter shots, 8 Avenger bolt cannon shots, 4 single-use Hellstrike missiles, Strafing Doctrine (no Move penalty on Heavy weapons), and Hard-Kill Anti-Infantry (Sustained Hits 1 plus Wound-1 re-rolls vs Infantry). 215 pts — the Legion's answer to massed enemy infantry. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSData ('Legiones Astartes.json', non-hidden, typed "Vehicle (Flyer, Stable)"). Real profile uses the older Vehicle armour-facing format (Front12/Side12/Rear12/HP6) rather than T/W/SV — no direct comparison possible, kept as-is (format conversion only).
