

HYPERIOS MISSILE TANK

ANTI-AIRCRAFT DEFENCE PLATFORM

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Heresy's dedicated anti-aircraft platform — a Rhino chassis carrying Skyspear missiles, tracking enemy flyers the instant they enter range.

M	T	SV	W	LD	OC
10"	9	3+	10	7+	2

RANGED WEAPONS

WEAPON	RANGE	A	BS	S	AP	D
Hyperios Missile Launcher	60"	4	3+	8	-2	2
Hull-Mounted Heavy Bolter	36"	3	3+	5	-1	2

ABILITIES

Hyperios Missile Launcher

[HEAVY] [ANTI-FLY 2+] [SKYFIRE]

Hull-Mounted Heavy Bolter

[SUSTAINED HITS 1]

Core

[DEADLY DEMISE D3] [SMOKE]

Skyspear Targeting

Each time this model makes a ranged attack with its Hyperios Missile Launcher against a target with the Fly keyword or the Aircraft keyword, that attack has the [SUSTAINED HITS 2] and [LETHAL HITS] abilities, and you can re-roll Hit rolls of 1.

Hard-Kill Interceptor

In your opponent's Movement phase, when an enemy Aircraft unit moves within 36" of this model, you can declare this model attempts an Interception. Roll one D6: on a 4+, this model can immediately make a ranged attack with its Hyperios Missile Launcher against that Aircraft (using its normal BS 3+ profile).

UNIT COMPOSITION

1 Hyperios Missile Tank model. This model is equipped with: 1 Hyperios Missile Launcher; 1 Hull-Mounted Heavy Bolter.

Keywords: VEHICLE, TANK, SMOKE, ANTI-AIR, HYPERIOS MISSILE TANK

Faction Keywords: ADEPTUS ASTARTES, LEGIONES ASTARTES (HORUS HERESY)

Designer's Note. Hyperios is the Heresy's dedicated anti-aircraft platform — a Rhino chassis with a Hyperios missile launcher (Skyspear missiles). No direct 10e/11e analog. HB: T9/Sv3+/W10 plus Sustained Hits 2, Lethal Hits, and Hit-1 re-rolls against Aircraft/Fly targets, plus a Hard-Kill Interceptor reaction shot in the opponent's Movement phase against approaching Aircraft. 145 pts — specialised, only worth fielding when the opponent has Flyers or Fly units. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSData ('Legiones Astartes.json', non-hidden, typed "Vehicle"). Real profile uses the older Vehicle armour-facing format (Front12/Side11/Rear10/HP5) rather than T/W/SV — no direct comparison possible, kept as-is (format conversion only).
