Core

[DEADLY DEMISE D6] [SMOKE]

Heavy Armoured Plating

Each time a ranged attack with a Strength characteristic less than this model's Toughness characteristic is allocated to it, roll one D6: on a 4+, that attack's Damage characteristic is reduced by 1 (to a minimum of 1).

Battle Tank Doctrine

Each time this model makes a ranged attack against an enemy Vehicle or Monster unit, that attack's AP characteristic is improved by 1.

Mounted Sponsons

This model can be equipped with two side sponsons. Choose one matched pair: Heavy Bolters (default), Multi-Meltas, or Lascannons. The pair fires every Shooting phase in addition to the turret weapon.

UNIT COMPOSITION

1 Kratos Assault Tank model. This model is equipped with: 1 Kratos Battle Cannon (or Kratos Melta Blastgun); 1 Hull-Mounted Lascannon; 1 pair of sponson weapons (Heavy Bolters, Multi-Meltas, or Lascannons).

Designer's Note. Kratos is HH3e's newest contribution to the Legion tank roster — a heavy battle tank designed for direct-fire dominance, larger than a Predator but smaller than a Land Raider. No direct 10e/11e analog. HB design: T10/W14/Sv2+ (between Predator T9/W11 and Land Raider T12/W16), plus Heavy Armoured Plating (a

50% chance to reduce incoming Damage by 1 against sub-Toughness attacks), +1 AP vs Vehicles/Monsters as its battle-tank doctrine, a Kratos battle cannon (D6+3 attacks, S10, AP-2, D3 — the heaviest non-super-heavy turret in this project), and matched sponsons. 350 pts. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSDData (`Legiones Astartes.json`, non-hidden, typed "Vehicle (Stable)"). Real profile uses the older Vehicle armour-facing format (Front14/Side14/Rear14/HP10) rather than T/W/SV — no direct comparison possible, kept as-is (format conversion only). This is the final card of the Space Marines HH folder — all 41 cards now complete.
