ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Heresy's short-range, high-damage siege artillery — a Rhino chassis carrying a high-velocity Medusa siege gun, equally deadly firing direct or lobbing shells over cover.

Alternatively, this model can fire its Medusa siege gun at targets it cannot see using the indirect-fire profile. It cannot benefit from Direct-Fire Siege Doctrine on a turn it fires this way.

Designer's Note. Legion Medusa is the Heresy's short-range, high-damage siege artillery — a Rhino chassis with a high-velocity Medusa siege gun. The Astra Militarum Medusa exists in 11e Legends; the Legion variant is the Marine-crewed pattern with better armour and a dual direct/indirect mode. HB: T9/Sv3+/W10 plus Sustained Hits 1 and Hit re-rolls when direct-firing visible targets, and an indirect-fire alternate mode at +24" range for a -1 AP penalty. 165 pts. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSDData ('Legiones Astartes.json', non-hidden, typed "Vehicle"). Real profile uses the older Vehicle armour-facing format (Front12/Side12/Rear10/HP4) rather than T/W/SV — no direct comparison possible, kept as-is (format conversion only).
