

MASTER OF DESCENT

DROP POD ASSAULT SPECIALIST

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Drop Pod assault specialist — coordinates the precision of a Drop Pod, Caestus, or Kharybdis arrival, and lets the rest of the army strike on the very turn it lands.

Leader

This model can be attached to one of the following units: Tactical Squad, Veteran Tactical Squad, Breacher Squad, Despoiler Squad, Tactical Support Squad, Seeker Squad, Heavy Support Squad, Recon Squad, or Veteran Assault Squad (Power Armour-equipped models only).

Leader (Jump Pack variant)

While in the Jump Pack variant, this model can instead be attached to a Veteran Assault Squad or any other Jump Pack-equipped unit.

Stoop of Vengeance

Friendly Drop Pods, Dreadclaw Drop Pods, Kharybdis Assault Claws, Caestus Assault Rams, and Termite Assault Drills arriving from Reserves are set up exactly where deployed instead of scattering. Units disembarking from these transports this turn ignore the Move-characteristic penalty to Heavy weapons fired this turn.

Drop Sight Augur

At the start of the first battle round, you can re-deploy up to 3 of your Drop Pod transports (and any units embarked within them) before the first player turn begins.

Charge from Above

On a turn in which this model arrived via Deep Strike from a Drop Pod, friendly units that also arrived from a Drop Pod within 6" of this model are eligible to declare a charge that turn, overriding the standard same-turn-Reserves restriction.

UNIT COMPOSITION

1 Master of Descent model, in one of the Armour Variants listed above. Equipped with: 1 Bolt Pistol; 1 Combi-Melta; 1 Power Weapon.

Designer's Note. Master of Descent is the Drop Pod assault specialist — coordinates the precision of a Drop Pod, Caestus, or Kharybdis arrival, and lets the rest of the army charge on the same turn it arrives. No direct 10e/11e analog (canonical Drop Pods are simple deliveries; Master of Descent makes them a strategic platform). HB design: Power Armour Captain-tier statline plus Drop Pod no-scatter, a first-turn re-deploy of up to 3 Drop Pods, and a "charge from reserves" bubble for friendly units within 6". 80 pts — the whole army can lean into a single Turn 1 Drop Pod alpha-strike around this character. **11th-edition verification, 2026-08-30:** real profile in `Legiones Astartes.json` is SAV2+/INV5+ (card had SV3+/INV4+, corrected both). Only one BSData entry exists for this unit (typed "Infantry (Command, Antigra)", M12), with no separate ground-vs-Jump-Pack breakout — applied the same correction to both of this card's rows, since they represent the same character.
