

MASTER OF SIGNALS

VOX-OFFICER SPECIALIST

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Heresy's vox-officer specialist — coordinates strategic reserves, calls in off-table bombardments, and keeps the Legion's ranged fire coordinated across the whole battlefield.

Leader

This model can be attached to one of the following units: Tactical Squad, Veteran Tactical Squad, Breacher Squad, Despoiler Squad, Tactical Support Squad, Seeker Squad, Heavy Support Squad, Recon Squad, or Veteran Assault Squad (Power Armour-equipped models only).

Leader (Terminator variants)

While in a Terminator armour variant, this model can instead be attached to a Cataphractii, Tartaros, or Saturnine Terminator Squad (matching armour type), or a Praetorian Command Squad.

Leader (Jump Pack variant)

While in the Jump Pack variant, this model can instead be attached to a Veteran Assault Squad or any other Jump Pack-equipped unit.

Vox-Coordination

At the start of your Command phase, select one friendly Legiones Astartes unit within 24" of this model. Until the start of your next Command phase, that unit re-rolls Hit rolls of 1 on ranged attacks, and ignores Move-characteristic penalties to its Heavy weapons.

Comms Network

Once per battle, in your Command phase, you can call in a single Off-Table Bombardment: nominate a point on the battlefield more than 6" from any friendly model. Each unit within 6" of that point suffers D3 mortal wounds (allocated by its controlling player). This cannot be used if this model is within Engagement Range of an enemy unit.

Strategic Reserves

While this model is on the battlefield, friendly Legiones Astartes units in Strategic Reserves arrive on a roll of 2+ instead of the standard Reserves roll.

UNIT COMPOSITION

1 Master of Signals model, in one of the Armour Variants listed above. Equipped with: 1 Master-Crafted Bolter; 1 Bolt Pistol; 1 Power Weapon; 1 Servo-Arm.

Designer's Note. Master of Signals is the Heresy's vox-officer specialist — coordinates strategic reserves, calls in off-table bombardments, and provides battlefield-wide hit-roll re-rolls via the Legion's vox network. No direct 10e/11e analog (canonical Space Marines has a Comms Array terrain piece but no character version). HB design: canonical Captain-tier statline plus a 24" friendly-unit-buff per Command phase, an off-table bombardment payload once per battle, and Reserves rolls that auto-pass on 2+. 80 pts — buff-focused, no front-line role. **11th-edition verification, 2026-08-30:** real profiles cross-checked in `Legiones Astartes.json` — base Master of Signals SAV2+/INV5+ (card had SV3+/INV4+, corrected both), Jump Pack variant matches base exactly (same fix). Unlike the other HQ cards in this folder, current BSData has **no Terminator-armour entry at all** for this character (not even a Cataphractii-only breakout) — kept the card's existing Cataphractii/Tartaros rows as a fully interpretive design choice, values unchanged since there's no real data to verify against.
