GUNSLINGER OUTCAST

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

Chain Fire

Each time this model shoots in the Shooting phase, after resolving all of its pistol attacks, it can immediately fire one of its pistols a second time at -1 to Hit. If that second shot scores a hit, it can fire that pistol one additional time at -2 to Hit (recurring to a maximum of 4 total shots from that pistol). The chain ends when a shot misses.

Walker

In your Shooting phase, after this model has fired all of its weapons, it can immediately make a Normal move of up to 6". This move can take it out of line of sight of enemies it shot at this turn.

Outcast

This model cannot be your Warlord and cannot be given any Enhancements.

UNIT COMPOSITION

1 Moritat model, in one of the Armour Variants listed above. Equipped with: 2 Plasma Pistols (or 2 of any one option: Hand Flamer, Volkite Serpenta, Inferno Pistol, or Archeotech Pistol); 1 Combat Blade.

Designer's Note. Moritat is the Heresy's gunslinger archetype — a Legion outcast who carries two pistols and resolves combat by stacking pistol shots in chain fire. No direct 10e/11e analog (canonical Space Marines has no paired-pistol character). HB design: Power Armour Marine baseline plus Lone Operative, a paired-pistol loadout (any of plasma, hand flamer, volkite, inferno, or archeotech), the iconic Chain Fire mechanic (fire a pistol again at -1, then -2, up to 4 total shots, ending on a miss), a 6" Shooting-phase post-shoot move, and the Outcast restriction (no Warlord, no Enhancements). 95 pts — build around mobility and paired plasma pistols for the highest expected damage per turn. **11th-edition verification, 2026-08-30:** real BSData has two related entries — "Moritat" (typed "Infantry (Specialist, Antigrav)", M12 — the Jump Pack form) and "Moritat Mortalis" (typed "Infantry (Specialist)", M7 — the ground form), both SAV2+/INV5+. This card's base and Jump Pack rows had SV3+/INV4+ — corrected both to 2+/5+, matching both real profiles exactly.
