Smoke Grenades

Once per battle, in your Movement phase, this model can deploy smoke: until your next Movement phase, attacks that target this model have -1 to Hit, and this model has the Benefit of Cover.

Designer's Note. Mortificator is the Legion's anti-Character assassin specialist — a Lone Operative infiltrator that exists to take out enemy commanders. No direct 10e/11e analog (canonical Assassins belong to the Officio Assassinorum, not to individual Legions). HB: Marine baseline plus M7" (faster than a standard Marine), Lone Operative, Stealth, Infiltrators, re-roll Hit/Wound and Precision against Characters, a once-per-battle "Silent Strike" mortal-wound delivery, a Mark of Vendetta target that ignores Look Out, Sir, and smoke grenades for a one-turn defensive bubble. 85 pts — pairs naturally with Vigilator and Recon Squad for a full anti-Character disruption package. **11th-edition verification, 2026-08-30:** real base profile is SAV2+/INV5+ (card had SV3+, corrected; invuln already matched). Jump Pack variant corrected to match base. Real BSData does have a Cataphractii Terminator variant ("Mortificator In Terminator Armour") that this card's original design never included — left out here too, consistent with a foot-infiltrator theme (same pattern as Vigilator).
