

SATURNINE TERMINATOR SQUAD

HEAVIEST PATTERN TERMINATOR PLATE (HH3E)

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The heaviest pattern of Terminator armour ever produced — heavier than Cataphractii, slower than anything except a Dreadnought, and fitted with integral atomantic stabilisers that grant unmatched protection against psychic attack.

ABILITIES

Combi-Bolter

[RAPID FIRE 2]

Saturnine Combi-Flamer

[TORRENT] [IGNORES COVER] — auto-hits, which is why it has no BS characteristic.

Saturnine Combi-Melta

[MELTA 2]

Saturnine Chainfist

[ANTI-VEHICLE 3+]

Saturnine Grav-Fist

[DEVASTATING WOUNDS]

Core

[DEEP STRIKE]. Each time a model in this unit is destroyed, its Deadly Demise is treated as 0 (the armour holds, even when the warrior inside is gone).

Saturnine Pattern Plate

Each time an attack with a Damage characteristic of 1 is allocated to this unit, that attack's Damage characteristic is reduced to 0. This unit also has the Feel No Pain 6+ ability.

Implacable Advance

This unit cannot be selected to make a Fall Back move, and ignores modifiers to its Movement characteristic.

Atomantic Field

Each time this unit is targeted by an attack with the [PSYCHIC] ability, its invulnerable save is improved to 3+ against that attack.

UNIT COMPOSITION

5 or 10 models: 1 Saturnine Sergeant and 4-9 Saturnine Terminators, in Saturnine-pattern Terminator armour. All models carry Combi-Bolters and Saturnine Power Weapons. Up to 2 models can replace their Combi-Bolter with a Saturnine Combi-Flamer, Combi-Melta, or Combi-Plasma. The Sergeant can replace its Power Weapon with a Saturnine Chainfist or Grav-Fist.

Designer's Note. Saturnine-pattern Terminator armour is HH3e's newest addition to the Terminator suit roster: heavier than Cataphractii, slower than anything except a Dreadnought, and equipped with integral atomantic stabilisers that grant unmatched protection against psychic attack. No direct 10e/11e equivalent — canonical Terminators are the lighter Indomitus/Tactical patterns, and Cataphractii/Tartaros are Legends. HB design: T5/Sv2+/W3 plus a 4+ invuln (3+ vs Psychic), Feel No Pain 6+, the iconic "Damage 1 attacks become Damage 0" Saturnine signature (ignores Devastating Wounds), cannot Fall Back, Deep Strike, and Deadly Demise 0 — the armour does not detonate, it simply stands. 250 pts for 5 sits above canonical Terminators (200 pts) and Cataphractii Legends (~230); justified by W3, the Damage-1 reduction, and the Feel No Pain stacking. The squad excels against horde fire (Damage 1) and crumples against Damage 2+ heavy weapons — an intentional vulnerability so the unit isn't an auto-include. **11th-edition verification, 2026-08-30:** real profiles confirmed in `Legiones Astartes.json` (Saturnine Terminator and Saturnine Terminator Sergeant, both T6 in the real d10 profile — interpretive tier, not corrected) — SAV2+/INV4+ matched this card exactly, no correction needed.
