

SCIMITAR JETBIKE SQUADRON

ANTI-GRAV STRIKE BIKES

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Heresy's anti-grav strike unit — White Scars in particular favoured them, but every Legion fielded some, twin bolters roaring as they close at speed.

Mounted

This unit has the Mounted keyword. Its anti-grav engines let it ignore Difficult Terrain and move freely over obstacles.

Jetbike Strike Doctrine

This unit can Advance and still shoot without the Heavy-weapon Move penalty. On a turn it moved 10" or more, ranged attacks made by this unit have the [LETHAL HITS] ability.

Scimitar Hunter Variant

Models with the Scimitar Hunter loadout (Heavy Bolter, Volkite Culverin, Multi-Melta, or Lascannon) re-roll Hit rolls of 1 with their special weapon against enemy Vehicle, Monster, and Walker units.

UNIT COMPOSITION

3 or 9 models: 1 Scimitar Sergeant and 2-8 Scimitar Riders, mounted on anti-grav jetbikes. All models carry Twin Legion Bolters as standard. Up to 3 models can take the Scimitar Hunter loadout, replacing their bolters with a Heavy Bolter, Volkite Culverin, Multi-Melta, or Lascannon. The Sergeant can take a Power Weapon, Power Fist, or Thunder Hammer.

Designer's Note. Scimitar Jetbike Squadron is the Heresy's anti-grav strike unit — White Scars in particular favoured them, but every Legion fielded some. No direct 10e/11e Space Marine analog (jetbikes have been removed from the canonical roster; the closest visual is Aeldari Shining Spears). HB: T5/Sv3+/W4 per model (+1 W vs an Outrider), Fly, Hover, Scouts 9", Advance-and-Shoot, Lethal Hits when moving 10"+, and a Scimitar Hunter sub-loadout (up to 3 models with heavy weapons) with anti-Vehicle re-rolls. 120 pts for 3, 360 for 9 — the fastest unit in this folder after the Sokar Stormbird. **11th-edition verification, 2026-08-30:** real profiles confirmed in `Legiones Astartes.json` (Scimitar Sergeant and Scimitar Hunter) — SAV3+ matched this card exactly, no invuln in either, no correction needed. Added a "Power Fist (Sergeant)" row to the melee weapons table — the composition text already listed it as a Sergeant option, but the table itself omitted it (a documentation gap in the original card, not a BSDData finding).
