

TERMITE ASSAULT DRILL

SUBTERRANEAN ASSAULT TRANSPORT

ADEPTUS ASTARTES — LEGIONES ASTARTES (HORUS HERESY)

The Heresy's burrowing transport — a drilling assault carrier that surfaces mid-table from Battle Round 2 onward, drill head first, straight into the enemy's rear.

Transport

This model has a transport capacity of 10 Legiones Astartes models. Cataphractii and Tartaros Terminators count as 2 models each.

Subterranean Assault

This model must start the battle in Strategic Reserves. It arrives via burrowing Deep Strike at the end of any of your Movement phases on or after Battle Round 2, anywhere on the battlefield more than 6" from enemy models. Embarked units can disembark within 3" of this model and are eligible to declare a charge.

Drill-Head Ramming

On a turn in which this model arrived via Subterranean Assault, it can target one enemy Vehicle, Monster, or Fortification unit within 3" of its arrival point. Roll one D6: on a 3+, that target suffers D3+3 mortal wounds.

UNIT COMPOSITION

1 Termite Assault Drill model. This model is equipped with: 1 Storm Bolter (or Twin Volkite Culverin); 1 Drill Head.

Designer's Note. Termite is the Heresy's burrowing transport — a drilling assault carrier that emerges from the ground mid-table. The unique angle is that it deploys from Battle Round 2 onward (not Turn 1), and only needs a 6" enemy-separation buffer (vs. the standard 9"). HB: T9/Sv3+/W11 plus Subterranean Assault (6" buffer Deep Strike from Battle Round 2), Drill-Head Ramming (D3+3 mortal wounds to a nearby Vehicle/Monster/Fortification on arrival), and a drill head melee weapon for follow-up turns. 165 pts. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSData as a real, separate "Termite" entry (‘Legiones Astartes.json’, non-hidden, typed "Vehicle (Transport)") — genuinely distinct from the Mechanicum "Mechanicum Termite" converted

earlier this session, both are real units in their own right. Real profile uses the older Vehicle armour-facing format (Front12/Side12/Rear10/HP5) rather than T/W/SV — no direct comparison possible, kept as-is (format conversion only).
