Vehicle Transport

This model has a unique transport capacity: it can carry one friendly Legiones Astartes Vehicle of size up to Land Raider (including any Land Raider variant, Spartan, Kratos, Sicaran [Legends], Predator, Rhino, Vindicator, Damocles, Hyperios, Sabre, or Arquitor). The carried Vehicle does not count as deployed until it disembarks.

Vehicle Drop

When this model arrives from Reserves, or in any of your Movement phases, it can set down its carried Vehicle anywhere within 6" of itself and more than 1" from enemy models. The carried Vehicle counts as having moved 6" that turn.

Strafing Run

Each time this model makes a ranged attack on a turn in which it moved 16" or more, that attack has the [SUSTAINED HITS 1] ability.

Designer's Note. Thunderhawk Transporter is the Thunderhawk variant configured to lift one Legion vehicle (Land Raider-class or smaller). The Heresy-era equivalent of an air-mobile vehicle drop. No direct 10e/11e analog. HB: T13/Sv2+/W22 (super-heavy aircraft tier), Hover, Fly, a unique single-Vehicle transport mechanic, the ability to set the carried Vehicle down within 6" of the Thunderhawk, and Sustained Hits 1 on a 16"+ movement turn. 400 pts — strategic, enabling a Land Raider or Spartan to arrive Turn 1-2 anywhere on the table. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSData (`Legiones Astartes.json`, non-hidden, typed "Vehicle (Transport, Super-heavy, Flyer)"). Real profile uses the older Vehicle armour-facing format (Front13/Side13/Rear13/HP16) rather than T/W/SV — no direct comparison possible, kept as-is (format conversion only).
