Leader (Recon Squad)

This model can be attached to a Recon Squad (HH variant), and grants that unit the Hunter's Mark and Disruption Camo bonuses below.

Mark Targets

At the start of the first battle round, select one enemy unit on the battlefield. For the rest of the battle, friendly Legiones Astartes units re-roll Hit rolls of 1 on ranged attacks that target that enemy unit.

Disruption Camo

Each time an attack is allocated to this model, the attacking unit has -1 to its Hit roll. This model is always treated as having the Benefit of Cover.

Silent Killer

Once per battle, in the Fight phase, this model's melee attacks have the [PRECISION] and [DEVASTATING WOUNDS] abilities until the end of the phase.

Designer's Note. Vigilator is the Legion's scout-HQ specialist — leads Recon Squads, marks targets for the rest of the army, infiltrates and assassinates Characters. Closest 10e/11e analog is Phobos Lieutenant. HB: Lone Operative, Scouts 9", Stealth, Infiltrators, a first-round army-wide target mark, and a once-per-battle Precision+Devastating Wounds melee strike. No Terminator/Jump Pack/Bike variants — Vigilator is a foot-scout role only. 80 pts. **11th-edition verification, 2026-08-30:** real profile in `Legiones Astartes.json` is typed "Infantry

(Command)" with SAV2+/INV5+ — a significant correction from this card's original SV4+ "scout armour" assumption (card had no invuln listed either). Unlike the Tech-Thrall pair elsewhere in this project, there's no second real BSData variant to justify keeping a deliberately lighter save here — real HH3e data treats the Vigilator as fully power-armoured despite the scout-role fluff, so both SV and INV are corrected to match.
