Designer's Note. HH3e Archmagos on Abeyant — same Archmagos baseline as the standard Archmagos, but mounted on a hover-throne: M10" Fly, +1 T, +1 OC, paired servo-arms reflecting the bigger frame. **11th-edition verification, 2026-08-28:** confirmed still current in fresh HH3e BSDData (`Mechanicum.json`, non-hidden). Real HH3e data types this unit as "Infantry (Command, Antigrav, Heavy)" — confirms the existing Infantry/Mounted/Fly keyword choice was already correct, and the real profile's T7/W6/INV4+ already matched this card exactly before this pass.
