

ARLATAX BATTLE-AUTOMATA

CYBERNETICA HEAVY ASSAULT ROBOT

MECHANICUM (HORUS HERESY)

The heaviest melee-spec Battle-Automata short of a Knight chassis — paired energy gauntlets crushing all before them, reactor cores overclocked to lethal excess.

ABILITIES

CORE: Deadly Demise D3

Plasma Fusil

[RAPID FIRE 2]

Paired Energy Gauntlets

[TWIN-LINKED] [SUSTAINED HITS 1]

Atomantic Shielding

This model has a 5+ invulnerable save.

Cortex Controller

While this unit is within 12" of a friendly Tech-Priest model, each time a model in this unit makes an attack you can re-roll a Hit roll of 1. If the friendly Tech-Priest has the Cybertheurgist keyword, re-roll all Hit rolls of 1.

Implacable Programming

This model automatically passes Battle-shock tests, and is unaffected by rules that would force it to Fall Back against its preprogrammed orders.

Doctrina Imperatives

This model gains the effect of the chosen Doctrina Imperative each Command phase (Conqueror: Hit roll of 6 scores an additional Hit; Protector: enemy Hit rolls suffer -1). See faction ability card.

Reactor Surge

Once per battle, in your Command phase, you can activate Reactor Surge on this unit. Until your next Command phase, models in this unit have +2" Move, +1 Attack on melee weapons, and gain the [LANCE] ability on melee attacks. At the end of that next Command phase, each model in this unit suffers 1 mortal wound.

UNIT COMPOSITION

3 Arlatax models. Add up to 2 more for +75 pts each. Every model is equipped with: 1 Plasma Fusil; 1 Paired Energy Gauntlets.

Designer's Note. HH3e Arlatax Battle Maniple. The heaviest melee-spec Battle-Automata short of a Knight chassis. T10 W8 OC3 anchors above Castellax/Domitax but below Knight-tier. Reactor Surge is the canonical HH3e signature — overclock for one round at a cost. **11th-edition verification, 2026-08-28:** confirmed the base "Arlatax" unit still current in fresh HH3e BSData (Mechanicum.json, non-hidden, typed "Automata (Antigrav)").

****Composition changed:**** the "Arlatax (Paragon of Metal)" named-leader variant this card previously called for is now `hidden: true` in fresh BSDData — unlike Castellax's Paragon of Metal (which has a genuinely unique Siege Wrecker weapon and needed restoring), Arlatax's Paragon of Metal has an IDENTICAL stat/weapon profile to the plain Arlatax, so there's no unique loadout being lost by dropping the distinction. Composition simplified to "3 Arlatax models," no named leader model.
