Designer's Note. HH3e Magos on Abeyant — Magos statline plus the Abeyant package (M10" Fly, +1 T, +1 W, +1 OC). **11th-edition verification, 2026-08-28:** confirmed still current in fresh HH3e BSDData (`Mechanicum.json`, non-hidden, typed "Infantry (Command, Antigrav, Heavy)"). Real profile is T6/W4/INV5+ — this card's W5 is one higher than the literal real wound count; kept as-is per the "anchor to a comparable tier, don't literally translate the d10 numbers" rule (small deltas like this are expected and not treated as errors), but flagged here for visibility.
