

SCYLLAX GUARDIAN-AUTOMATA

CYBERNETICA ESCORT MANIPLE
MECHANICUM (HORUS HERESY)

Lighter escort-class automata built to bodyguard Tech-Priests, the Scyllax stand watch with bolt caster and power blade, shielding their masters from harm.

ABILITIES

Bolt Caster

[RAPID FIRE 1]

Cortex Controller

While this unit is within 12" of a friendly Tech-Priest model, each time a model in this unit makes an attack you can re-roll a Hit roll of 1. If the friendly Tech-Priest has the Cybertheurgist keyword, re-roll all Hit rolls of 1 instead.

Implacable Programming

This model automatically passes Battle-shock tests, and is unaffected by rules that would force it to Fall Back against its preprogrammed orders.

Doctrina Imperatives

This model gains the effect of the chosen Doctrina Imperative each Command phase (Conqueror: Hit roll of 6 scores an additional Hit; Protector: enemy Hit rolls suffer -1). See faction ability card.

Guardian Protocols

While this unit is within 3" of a friendly Mechanicum Character, that Character has the Feel No Pain 5+ ability and ranged attacks against it suffer -1 to the Wound roll.

UNIT COMPOSITION

5 models: 1 Sub-Construct Alpha and 4 Scyllax. Can include up to 5 additional Scyllax models for +18 pts each. Each Scyllax is equipped with: 1 Bolt Caster; 1 Power Blade. The Sub-Construct Alpha is equipped with: 1 Bolt Caster; 1 Alpha's Mass-Driver Fist.

Designer's Note. HH3e Scyllax Guardian Maniple. Lighter escort-class automata, intended to bodyguard Tech-Priests. Statline anchored between Skitarii Vanguard and Wraithguard (T7 W3 — smaller chassis than Castellax). Guardian Protocols gives them a clear board role independent of their parent unit. **11th-edition verification, 2026-08-30:** confirmed still current in fresh HH3e BSData as "Scyllax Guardian Maniple" (`Mechanicum.json`, non-hidden, typed "Automata"). Real SAV3+ matched; real INV6+ was missing from this card entirely — added (invuln maps directly per established convention). Also checked `Scyllax (Paragon of Metal)`: hidden and byte-identical to the plain Scyllax profile, same pattern as Arlatax/Domitar/Echidnax — this card's separate "Sub-Construct Alpha" leader concept is unrelated to BSData's Paragon of Metal naming, no composition change needed.
